

The Art of Restorative Treatment

Smart Solutions
from GC
for all your
Clinical Challenges

“GC”

How to choose the optimal restorative material?

Today more than ever, many types of restorative materials are available on the market and it becomes more and more challenging to determine which one is the most appropriate to use in each clinical situation.

What are the **most important characteristics** of a restorative material?

Strength? Aesthetics? Speed? Biocompatibility? ...

What are the **key patient & case-related factors** to take into consideration?

Isolation? Patient compliance? Carious risk? Aesthetic demand? ...

How to **reach the top** of **clinical success**?

Discover GC's innovative solutions for all your restorative challenges

Since its foundation, GC has always had a strong focus on the development of **innovative restorative materials** to fit each clinical situation.

Almost a hundred years down the line, GC is proud to display a full portfolio of restorative products and to be able to guide you through...

GC Smart Solutions
for all your clinical
challenges.

Which restorative material...

High caries risk?

Less cooperative patients?

Temporisation solution needed?

No perfect isolation possible?

Moderate aesthetic demand or affordable solution needed?

Choose a **Glass Ionomer**

Restorations are our Legacy

GC's Glass Ionomers

- Fuji II LC
- Fuji TRIAGE
- Fuji IX family
- Fuji VIII GP
- Conditioners

The unique advantages of glass ionomers

Glass ionomers are **moisture-tolerant**

The **use of a rubber dam is optional** when restoring a tooth using a glass ionomer, as these materials **can tolerate moisture**. This is a big advantage for **subgingival cases** or those requiring a **short procedure time**.

Glass ionomers **chemically bond** to tooth

Glass ionomers **chemically bond** to natural teeth, without the use of any adhesive or primer. From **young aprismatic enamel** up to **old sclerotic dentin**, a **durable marginal seal** and an **optimal longevity** are ensured.

Glass ionomers are **tooth-friendly**

Glass ionomers can be used in the **partial caries excavation** technique, helping to create minimally invasive preparations. As no etching is used, there is **no risk of post-operative sensitivity** – which also makes glass ionomers a **safe treatment solution**.

GC Fuji® II LC

Light-cured resin-modified glass ionomer restorative

Simple technique – Beautiful long-lasting results

Key advantages

- **Controlled setting with the light** for a straightforward & simple procedure
- Excellent aesthetics & translucency
- Outstanding proven clinical performance
- Ideal for **cervical erosion / abfractions, root surface** restorations & **pedodontics**
- Also optimal in the **closed & open sandwich technique**
- High chemical adhesion for a **perfect marginal integrity**

Delivery

- Capsule
- Powder/Liquid

Shade Range

- A1, A2, A3, A3.5, A4, B2, B3, B4, C2, C4, D2

„Fuji II LC is a very good material when isolation of the cavity is challenging, like for pediatric or geriatric cases. Fuji II LC also bonds optimally to dentin – even if sclerotic – making it a good choice for class V restorations, especially those caused by abrasion.“

Dr Martin Hoftvedt, Norway

Restoration of cervical erosions using Fuji II LC

Courtesy of Dr Geoff Knight, Australia

Restoration of Class III pedodontic cavities using Fuji II LC

Courtesy of Dr Jamie Lucas, Australia

GC Fuji® TRIAGE

Low-viscosity glass ionomer protection
& temporary restorative

The most polyvalent material for difficult situations
Guiding the way to caries stabilisation and surface protection

Key advantages

- Moisture tolerance for **easy placement**, even for **partially erupted molars**
- Low viscosity and excellent flow for **perfect sealing of deep pits & fissures**
- **Go-to product for tricky situations:** kids, elderly, high caries risk, teeth with MIH...
- Available in a unique **pink colour** with **accelerated setting** and enabling an **easy monitoring**
- **Easy removal of temporary restorations or endo-access restorations** thanks to the pink colour
- Also optimal for the treatment of **hypersensitivity**

Delivery

- Capsule
- Powder/Liquid

Shade range

- Pink, White

„Being amongst the first users of Fuji TRIAGE in France and after so many years using it, I am still loyal to this glass ionomer. It has no equivalent and is so handy for everyday preventive dentistry.“

Dr Michel Blique, France

Protection of a partially erupted molar with Fuji TRIAGE Pink

Courtesy of Dr Michel Blique, France

Root surface protection with Fuji TRIAGE White & a protective coating layer

Courtesy of Dr Graeme Milicich, New-Zealand

GC Fuji® IX GP, GP FAST & GP EXTRA

High viscosity posterior glass ionomer restoratives

The proven „gold standard“
Hassle-free glass ionomers for posterior cavities

Key advantages

- Condensable materials, **easy to apply and to contour**
- Resin-free
- Ideal to use in the **closed sandwich technique** & for **temporary restorations**
- Fuji IX GP FAST displays a **much shorter procedure time**: only 3 minutes from mixing to finishing
- Fuji IX GP EXTRA offers **higher translucency** and **shorter setting time**

Delivery

- Fuji IX GP FAST: Capsule
- Fuji IX GP & Fuji IX GP EXTRA: Capsule & Powder/Liquid

Shade Range

- Fuji IX GP: A2, A3, A3.5, B2, B3, C4
- Fuji IX GP FAST: A1, A2, A3, A3.5, B2, B3, C4
- Fuji IX GP EXTRA: A1, A2, A3, A3.5, B1, B2, B3, C4

Failing amalgam restorations

Amalgam removal & preparation

Fillings with Fuji IX GP EXTRA

Final temporary restorations

Courtesy of Dr Matteo Basso, Italy

GC Fuji® VIII GP

Self-cure resin-modified glass ionomer anterior restorative

Key advantages

- High aesthetics & translucency, ideal for anterior cases
- Excellent mechanical properties and **marginal integrity over time**
- Bulk-fill application

Delivery

- Capsule
- Powder/Liquid

Restoration of deep Class III cavities with Fuji VIII GP

Shade range

- A2, A3, A3.5, B2, B3, C4

GC Conditioners

Key advantages

- Clean the surface effectively for **improved adhesion**
- Improve **wettability & adaptation** of the restorative material
- Prepare dentin & enamel for chemical adhesion **without opening the dentinal tubules**
- Enhance the **marginal seal**
- Blue tint for a **controlled application**

GC Dentin Conditioner

Polyacrylic acid cavity conditioner

- 10% polyacrylic acid
- Application time of **20 seconds**

GC Cavity Conditioner

Cavity cleaning agent

- 20% polyacrylic acid
- 3% aluminum chloride hexahydrate
- Application time of **10 seconds**

The new Generation of long-term Restoratives

GC's
Long-Term
Biomimetic
Systems

- EQUIA
- EQUIA Forte HT

GC EQUIA®

Bulk-fill long-term restorative system

The proven posterior restorative system Long-term aesthetics simplified

Key advantages

- **Long-term indications** thanks to the combination of a **fast-setting & translucent high-viscosity** material (EQUIA Fil) and a **highly filled resin coating** (EQUIA Coat)
- **Quick and technique-tolerant permanent** material
- High **fracture toughness, flexural strength** and **flexural fatigue resistance**
- Increased strength of the material over time due to the **unique maturation effect**, attributed to saliva
- Total procedure time of **only 3'30"**
- The **most aesthetic in its class** thanks to a **high translucency**
- **10 years of clinical proof** showing excellent success rates in posterior restorations

„The EQUIA restorative system is indicated for temporary and permanent restorations (small occlusal & proximal cavities) and has remarkable properties: chemical adhesion to tooth tissues, marginal seal, improved mechanical properties, technique-tolerance, fast procedure and biocompatibility.“

Dr Jean-Pierre Attal, France

Aesthetic amalgam replacements with EQUIA

Courtesy of Dr Magdalena Kukurba-Setkowicz, Poland

Restoration of Class V cavities with EQUIA

Courtesy of Dr Michel Bllique, France

Delivery

- EQUIA Fil: Capsule
- EQUIA Coat: Bottle

Shade range

- A1, A2, A3, A3.5, B1, B2, B3, C4, SW

The added advantages of glass hybrid technology

Glass Hybrids
take you to the next level

Glass hybrid systems offer the **strength of the latest innovative glasses** combined to the **wear resistance of a filled coating**. The unique synergy between the coating and the restorative material **improves the durability and wear resistance** of the restorations.

Glass Hybrids
are true bulk fill materials

Glass hybrid materials are **chemically cured** in a short time and do not require to be placed in layers. There is **no limit in the depth of cure** and **no shrinkage** linked to the setting of the materials, making them a **very safe solution for bulk application**.

Glass Hybrids
widen your options

Thanks to their resistance, glass hybrids are the only glass-based materials which offer **extended indications**. They are ideal materials for class V and **load bearing class I & II cavities.***

Glass Hybrids
are long-term restoratives

Clinical studies have shown that glass hybrids are an excellent option for **long-term posterior restorations** and for the **replacement of old amalgams**.

GC EQUIA Forte™ HT

Bulk-fill glass hybrid restorative system

Strength allied with beauty

Key advantages

- Excellent balance of **strength and handling** thanks to the intelligent control of particle distribution and interaction of **Glass Hybrid technology**
- **Non-sticky** consistency, perfect to be used in bulk **without any bonding agent**
- **High translucency** for better aesthetic results, thanks to the material's optimised refractive index
- Perfect material for **long-term Class I & II restorations**
- Safe treatment solution for **deep cavities with limited post-operative sensitivity**
- Excellent **alternative to amalgam**
- Ideal to **restore teeth affected by MIH** thanks to a great chemical adhesion even to untreated dentin

"Aesthetic, biomimetic, strong and practical... With these properties, EQUIA Forte HT provides more effective treatment options for patients with deep carious lesions in my clinical practice - without any sensitivity."

Dr Zeynep Bilge Kütük, Turkey

Initial situation showing interproximal caries

Preparation and placement of sectional matrices

When Aesthetics meet Longevity

GC's Composites

- Essentia family
- G-ænial family
- GRADIA DIRECT family
- everX Flow
- GRADIA CORE

The unique strengths of composites

Composites are **highly aesthetic**

Composite is the best choice when looking for a **highly aesthetic material** for anterior restorations or demanding patients. Their **translucency** and **light-scattering ability** makes them **blend naturally with the surrounding tooth structure** for a perfect final outcome.

Composites are **very strong**

Modern composites feature **high strength** and are able to **withstand masticatory forces**. They are also developed to **resist wear** and to **keep a smooth surface** over time. Another advantage of composites is that they induce **less wear to the antagonists** than ceramic materials.

Composites are **particularly durable**

Thanks to their excellent physical properties, composite materials are **very durable** and can keep performing well **both functionally & aesthetically** on the **long term**. A **good hygienic compliance** is however needed to avoid the accumulation of plaque which can lead to secondary caries.

Open the door to simplification Discover aesthetic innovation

Key advantages

- **Intuitive shade selection** thanks to a simplified range of 7 shades
- High aesthetic results made simple with a **duo-layering concept** that aims to **mimic the natural ageing of teeth**
- **High gloss retention** thanks to the ultra-fine particles used in the enamel shades
- **Handling of each shade optimised** to its use (softer dentins, packable Universal...)
- Low inventory: **only 7 syringes** for all your cases
- **Characterisation possible** with Essentia Modifiers for high-end aesthetics

Shade Range

- **3 Dentins:** Light (LD), Medium (MD), Dark (DD) for a perfect blending
- **2 Enamels:** Light (LE), Dark (DE) for optimal translucency & opalescence
- **1 Universal (U)** for posterior mono-shade restorations
- **1 Masking Liner (ML)** to conceal discolourations
- **4 Modifiers** (Opalescent OM, Black BM, White WM, Red-Brown RBM) for special effects

„Emulating nature with composite is a difficult challenge, however with Essentia it becomes a simple task: just focus on properly shaping dentin and enamel and the material will do the rest for you. A truly smart system.“

Dr Javier Tapia Guadix, Spain

Initial case

Palatal shell with Light Enamel

Dentin layer with Medium Dentin

Final result

GC Essentia® HiFlo

Universal light-cured composite
with high flowability

GC Essentia® LoFlo

Universal light-cured composite
with low flowability

Small Class I cavities

Restored with Essentia HiFlo

Go one step further with Essentia Universal
1 shade, 3 strong options for all posterior indications

Key advantages

- One Universal (U) shade available in **three viscosities** (HiFlo, LoFlo, paste)
- Amazing natural **blending effect**
- All viscosities **recommended from Class I to Class V**, including occlusal cavities
- **Excellent physical properties** for all viscosities, even the most flowable
- Choose your **preferred handling**: HiFlo for a high wettability and flowability, and LoFlo for an excellent thixotropy
- **Low inventory** as one shade can be used for all posterior cases

Shade range

- 1 Universal shade (U)

„Minimally invasive procedures involve the design of very small cavities and in such clinical situations, flowable composites can be very useful. While Essentia HiFlo is able to penetrate the tiniest pits and fissures, Essentia LoFlo is ideal for bigger occlusal restorations thanks to its thixotropic viscosity.“

Dr David Gerdolle, Switzerland

Non-carious lesions

G-ænial® Anterior G-ænial® Posterior

Light-cured radiopaque composite restoratives

The art of creating invisible & long-lasting aesthetics
Enjoy great handling & amazing blending

Key advantages

- **Effortless handling** with a smooth & non-sticky viscosity
- High aesthetic level thanks to **optimal light-scattering & blending**
- **Versatile in use:** from single shade simplicity to multi-shade complexity
- Enamel selection **based on the age** of the patient
- Posterior version more packable & radiopaque for **easy placement & follow-up**

Shade Range

G-ænial Anterior:

- Standard shades: XBW (Extra Bleach White), BW (Bleach White), A1, A2, A3, A3.5, A4, B1, B2, B3, C3, CV (Cervical), CVD (Cervical Dark)
- Inside (opaque) shades: AO2, AO3, AO4
- Outside (enamel) shades: JE (Junior), AE (Adult), SE (Senior), TE (Translucent), IE (Incisal), CVE (Cervical)

G-ænial Posterior:

- Standard shades: P-A1, P-A2, P-A3, P-A3.5
- Outside (enamel) shades: P-JE (Posterior Junior), P-IE (Posterior Incisal)

Multi-shade layering with G-ænial Anterior

G-aenial® Universal Injectable

Universal high-strength restorative composite

Transform the way you work
Start injecting!

Key advantages

- **Indicated for all cavity classes** (without any covering layer) thanks to an exceptional strength & wear resistance
- No slumping: the material **perfectly keeps its shape** thanks to an optimal thixotropy
- **Easy extrusion** from the syringe & **not sticking to the tip** – for maximum comfort
- **Long-lasting aesthetics** thanks to excellent **gloss retention** and color stability
- Bendable dispensing tips for **easy access to any cavity**
- High radiopacity for a **perfect follow-up**

„G-aenial Universal Injectable is the material of choice for all restorative indications. On top of being very easy to control, it has an exceptional strength and a perfect blending with the natural tooth tissues.“

Dr Ahmed Al-Jaff, Iraq

Initial deep Class II cavity

Bendable tips are very useful to reach undercuts

Cavity transformed into a Class I

Final situation after finishing and polishing

Courtesy of Dr Javier Tapia Guadix, Spain

Shade range

16 shades in 3 translucency levels:

- Standard shades: XBW (Extra Bleach White), BW (Bleach White), A1, A2, A3, A3.5, A4, B1, B2, CV (Cervical), CVD (Cervical Dark)
- Inside (opaque) shades: AO1, AO2, AO3
- Outside (enamel) shades: JE (Junior), AE (Adult)

G-aenial® Universal Flo

Universal light-cured injectable composite

From the smallest Class V to the most extensive Class II restoration: controlled flow, maximum strength!

Key advantages

- **Full-strength** universal restorative for **all classes of cavities**
- Controlled flow for a **perfect adaptation**
- Optimal thixotropy for **easy build-up of anatomical forms**
- Outstanding **gloss retention** in time
- **Superb aesthetics** with 15 shades featuring **excellent blending**

Shade range

15 shades in 3 translucency levels:

- Standard shades: BW (Bleach White), A1, A2, A3, A3.5, A4, B1, B2, B3, C3, CV (Cervical)
- Inside (opaque) shades: AO2, AO3
- Outside (enamel) shades: JE (Junior), AE (Adult)

„A real flowable material for every indication – very good mechanical properties, easy to use, very nice colour and layering technique.“

Dr Zbynek Mach, Czech Republic

Initial Class V cavity

Final result

Initial Class I & II cavities

Final result

Courtesy of Prof Joseph Sabbagh, Lebanon

G-ænial® Flo X

Light-cured radiopaque flowable composite

From creating perfect linings to restoring narrow tunnel preparations: discover the foundation of perfect aesthetics!

Key advantages

- Optimal viscosity for **lining and small cavities**
- Great flowability for a **perfect adaptation** to cavity walls
- Easy follow-up** thanks to a high radiopacity even at low thickness
- Opaque shades to **mask cavity bottom discolorations**
- Ergonomic syringe design for a **comfortable and precise application**

Shade range

8 shades in 2 translucency levels:

- Standard shades: A1, A2, A3, A3.5, A4, CV (Cervical)
- Inside (opaque) shades: AO2, AO3

„G-ænial Flo X is optimal to use together with G-ænial Posterior for cases with multiple areas of decay. It is an ideal indication, because the high radiopacity helps to detect quickly the emergence of secondary caries.“

Dr Frédéric Raux, France

■ GRADIA® DIRECT Anterior ■ GRADIA® DIRECT Posterior ■ GRADIA® DIRECT X

Light-cured composite restoratives

Diastema closure with GRADIA DIRECT Anterior

Courtesy of Dr Javier Tapia Guadix, Spain

One shade simplicity and aesthetic invisibility – proven

Key advantages

- **Invisible natural aesthetics** thanks to superb chameleon effect
- **Clinically proven** over more than ten years
- Excellent handling featuring **easy placement & shaping** and a **long working time**
- Optimal for both **single-shade and multi-shade** restorations
- Available in **Anterior and Posterior** versions, as well as **GRADIA DIRECT X** featuring a higher radiopacity

„The predictability, ease of adaptation & sculpting and proven quality of GRADIA DIRECT make it possible to achieve the reliability and aesthetics that my patients expect.“

Dr Michał Szewczyk, Poland

Hypoplastic enamel on central incisors restored with GRADIA DIRECT Anterior at 9 and 12 years recall

Courtesy of Dr Serhat Köken, Turkey

Shade range

GRADIA DIRECT Anterior:

- Standard: XBW (Extra Bleach White), BW (Bleach White), A1, A2, A3, A3.5, A4, B1, B2, B3, C3, CV (Cervical), CVD (Cervical Dark)
- Inside (opaque): AO2, AO3, AO4
- Outside (translucent): DT (Dark), CT (Clear), GT (Gray), NT (Natural), WT (White), CVT (Cervical)

GRADIA DIRECT Posterior:

- Standard: P-A1, P-A2, P-A3, P-A3.5
- Outside (translucent): P-WT (Posterior White), P-NT (Posterior Natural)

GRADIA DIRECT X:

- X-A1, X-A2, X-A3, X-A3.5, X-AO2, X-WT (White Translucent)

GRADIA® DIRECT Flo

GRADIA® DIRECT LoFlo

Light-cured flowable composites

Aesthetic hybrid microfilled composites for simple restorations

Key advantages

- Two viscosities to cover **many indications**:
 - GRADIA DIRECT Flo (highly flowable) is optimal for **lining, undercuts or enamel imperfections**
 - GRADIA DIRECT LoFlo (high viscosity flowable) is perfect to achieve a **stable placement without slumping**
- Highly filled composites for **superior strength and wear resistance**
- **Clinically proven** over more than ten years
- Combining **ease of use & natural aesthetics**

Shade range

GRADIA DIRECT Flo & GRADIA DIRECT LoFlo: 7 shades in 2 translucency levels

- Standard shades: BW (Bleach White), A1, A2, A3, A3.5, CV (Cervical)
- Inside (opaque) shade: AO3

„Versatile and effective, GRADIA DIRECT Flo displays an excellent wettability and great ability to fill the smallest gaps, without being too flowable. Its application can thus be fully controlled, both at the cavity bottom (avoiding the risk of voids) and when creating splints or sealing fissures.“

Dr Laurent Viard, France

Initial situation

everX Flow™

Short-fibre reinforced flowable composite for dentin replacement

Strong to the core
The toughest composite substructure to reinforce your restorations

Key advantages

- Optimal to **strengthen large restorations** thanks to the **reinforcing effect of fibres**
- **Excellent fracture toughness** reducing the risk of catastrophic failures
- Perfect thixotropy for an **easy placement & adaptation**
- **No slumping** even in upper molars
- **Quick procedure** when using the Bulk shade (with a layer thickness up to 5,5mm)
- **Excellent aesthetic results** with the Dentin shade (in layers of 2mm)
- Indicated both for **dentin replacement** and for **core build-up** preparations

Shade range

- **Dentin shade**
- **Bulk shade (Translucent)**

„Flowable, easy to use and biomimetic, everX Flow is a unique restorative material able to emulate both dentin and dentino-enamel junction (DEJ) by providing the elasticity and toughness of dentin and the unique stress-breaking property of the DEJ.“

Dr Mark Frater, Hungary

Cavity preparation

Application of everX Flow (Dentin shade)

Final layer with Essentia (Universal shade)

Post-operative situation

Courtesy of Georg Benjamin, Germany

GRADIA® CORE

Dual-cure composite for core build-up & post cementation

Complete system for aesthetic core build-up
and post luting in only one appointment

Key advantages

- Optimal thixotropy: **flows under pressure** for post luting, **stays in shape** for core build-up without using pre-forms
- **Easy procedure** with limited steps for a one-appointment realisation
- Cutting feeling similar to dentin, for an **easier finishing** and **smooth edges**
- **Strong enough** to resist the occlusal pressure thanks to a 75% filler load
- Modulus of elasticity close to dentin, to **naturally distribute the stress** in the tooth structure
- **Secured adhesion** thanks to a combination of dual-cure and contact-cure

Shade range

- One universal shade

„Working with GRADIA CORE is extremely easy as it can be used both to lute posts and to create the core build-up, thereby making the restoration strong & monolithic. It is also time & cost-saving as everything can be done using the same mixing tip! Additionally, the hardness of the set material is very close to that of dentin, therefore it's easy to prep the stump for indirect restorations without creating grooves at the interface between the tooth structure and the core material.“

Dr Rosen Venelinov, Bulgaria

Trial fit of the post

D-Light® Pro

Dual wavelength LED curing light

Cure. Protect. Detect... See the invisible with D-Light Pro's Detection Mode

Key advantages

- Wide emission range to **efficiently polymerise all materials**, regardless of the initiator
- High Power mode to have **the highest curing efficiency** for all routine cases
- Low Power mode optimal to **limit heat generation** when close to the pulp
- Detection mode based on violet light to **visualise active plaque, micro-leakage, old restorations...**
- **Effortless handling & maximum comfort** thanks to a light and thin handpiece
- Autoclavable handpiece & light-guide for **optimal hygiene**

Technical characteristics

Wavelength range

- Peaks at 400-405nm & 460-465nm
- Polymerisation of visible light curing materials curing with a wavelength range of 400 to 480nm

Power output

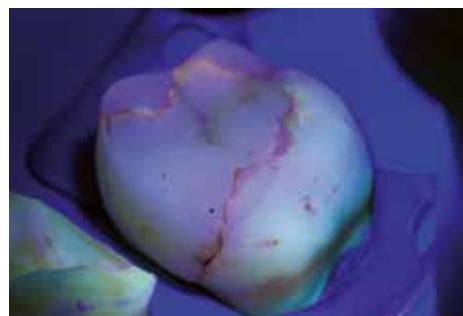

- High Power mode: 1400mW/cm²
- Low Power mode: 700mW/cm²

„The additional visual information you get while using the Detection mode of D-Light Pro during examination, caries excavation, composite removal and even composite reconstruction is a valuable bonus to the curing modes.“

Dr Stephane Browet, Belgium

Detection of active plaque

GC G-Premio BOND

One-component light-cured universal adhesive

Discover GC's universal bonding agent: zero compromises on performance – zero compromises on manipulation

Key advantages

- Compatible with **all etching techniques** (self-etch, selective etch or total-etch)
- Indicated for direct bonding, but also for **hypersensitivity treatment & repair cases**
- **Optimal performance on different substrates** thanks to 3 functional monomers (4-MET, MDP & MDTP)
- Extremely thin film thickness (3µm) for very **low chances of discoloration**
- **No post-operative sensitivity** thanks to an excellent penetration into dentinal tubules
- Very **easy procedure** with low technique sensitivity
- **No waste** thanks to a long working time and a thin nozzle delivering up to 300 drops per bottle

Delivery modes

- Bottle
- Unit Dose

„Predictable bonding to dental substrates has long been an onerous and technique-sensitive task. G-Premio BOND has eliminated these issues for all direct and indirect procedures. It truly is a fantastic material.“
Dr Serhat Köken, Turkey

Selective etching of enamel

Dispensing of G-Premio BOND

Application of G-Premio BOND

Invisible bonding layer

GC G-ænial® Bond

One-component self-etching light-cured adhesive

Key advantages

- Compatible with both **self-etch** and **selective etch** techniques
- **Long-lasting bond strength** to both **enamel & dentin**
- Excellent **marginal integrity** in time, proven in independent tests
- **No post-operative sensitivity** as dentin is not etched

Delivery

- Bottle

Optional selective enamel etching

Application of G-ænial Bond

Courtesy of Dr Stanisław Lassociński, Poland

GC G-BOND

One-component self-etching light-cured adhesive

Key advantages

- **True one-bottle system** with a one-step application
- Very **easy & fast procedure** with low technique sensitivity
- Extensive clinical proof showing **superior performance in time**
- Mild etching effect & HEMA-free composition for the **best durability**

Delivery

- Bottle
- Unit Dose

Application in self-etching mode

Final restorations

Courtesy of Dr Javier Tapia Guadix, Spain

Minimally invasive & patient-friendly fibre reinforcement solutions for daily dentistry

Key advantages

- Minimally invasive and **reversible** solutions, leaving **all options open** for future treatments
- Extensive clinical **proof** & in vitro research available
- Superior **mechanical properties**
- Unique patented **bonding** with IPN (Interpenetrating Polymer Network) technology
- **Economical alternative** to indirect treatments

Indications

- Fibre-reinforced composite **bridges**
- Advanced root canal **post & core** structures
- **Splints** of mobile and traumatised teeth
- Orthodontic **retainers**

„I hear dentists say that working with fibres is difficult. They probably never tried everStick... It's instant, easy to handle, extremely durable under load and enables to treat patients in a minimally invasive way. What else can you ask for?“

Dr Rudolf Novotny, Slovakia

■ NEW METAL STRIPS

Interproximal finishing strips

Key advantages

- Very thin, **flexible & resistant** material
- Autoclavable & easy to clean
- **4 different grits** (Extra Coarse, Coarse, Medium, Fine)

■ EPITEX

Finishing & polishing strips

Key advantages

- Very thin, **flexible & resistant** material
- Handy dispensing system
- **4 different grits** (Coarse, Medium, Fine, Extra Fine) & **matrix strips**

Using EPITEX (Medium Grit) to finish the interproximal areas

Courtesy of Dr Javier Tapia Guadix, Spain

■ DIAPOLISHER PASTE

Diamond polishing paste for composite & porcelain

Key advantages

- Optimal to quickly achieve **final high luster**
- Effective in **avoiding plaque attachment and discolorations**
- **Easy to wash** away with water
- Nice minty flavor for **patient comfort**

■ GC Modeling Liquid

Liquid to model composite materials for direct restorations

Key advantages

- Simplifies the **application & shaping** of direct composites
- Provides a **smoother aspect to the last layer**
- **Invisible** to achieve the best aesthetic results

Applying Essentia composite using a brush wetted with GC Modeling Liquid
