FIND SUCCESS IN OVER 33 MILLION RESTORATIONS

#1 Top-Selling Glass Ionomer Restorative in the US

- Excellent translucency for outstanding esthetics restorations
- High rechargeable fluoride release with virtually no recurrent decay
- Strong chemical bond to tooth resulting in exceptional marginal seal
- 1.5 times the radiopacity of enamel (315% Al)

GC Fuji II LC®
Resin-Modified Glass Ionomer Restorative

Townie Choice Award® Winner in Restorative Dentistry
– Glass Ionomers category for last three years.
Outstanding Physical Properties & Handling

Featuring an outstanding chemical bond to tooth structure, GC Fuji II LC®’s high compressive, tensile and flexural strengths assure longevity and integrity. Its consistency makes it easy to place and contour. And, like all GC glass ionomers, it works perfectly in a moist field.

Closed Sandwich Technique Using GC Fuji II LC®

Class II preparation with shallow supragingival box. CAVITY CONDITIONER (GC) is recommended to remove the smear layer.

Placement of GC Fuji II LC® occlusally.

Light-curing of GC Fuji II LC®.

Apply G-Premio BOND™, then place G-ænial Sculpt® composite, followed by light-curing.

Final, esthetic glass ionomer and composite sandwich technique restoration.

Class V Restorations using GC Fuji II LC®
