Discover GC's innovative solutions for all your restorative challenges

Since its foundation, GC has always had a strong focus on the development of **innovative restorative materials** to fit each clinical situation.

Almost a hundred years down the line, GC is proud to display a full portfolio of restorative products and to be able to guide you through...

GC Smart Solutions for all your clinical challenges.

Which restorative material...

High caries risk?

Less cooperative patients?

Temporisation solution needed?

No perfect isolation possible?

Moderate aesthetic demand or affordable solution needed?

Choose a Glass Ionomer

Choose a Glass

The unique advantages of glass ionomers

Glass ionomers are moisture-tolerant

The use of a rubber dam is optional when restoring a tooth using a glass ionomer, as these materials can tolerate moisture. This is a big advantage for subgingival cases or those requiring a short procedure time.

Glass ionomers chemically bond to tooth

Glass ionomers **chemically bond** to natural teeth, without the use of any adhesive or primer. From **young aprismatic enamel** up to **old sclerotic dentin**, a **durable marginal seal** and an **optimal longevity** are ensured.

Glass ionomers are tooth-friendly

Glass ionomers can be used in the partial caries excavation technique, helping to create minimally invasive preparations. As no etching is used, there is no risk of post-operative sensitivity – which also makes glass ionomers a safe treatment solution.

Glass ionomers are natural reservoir for ions

Through ion exchange, ions are being uptake from surroundings (saliva, tooth paste...), and diffuse into e.g. from tooth structure. This gives glass ionomers the ability to stimulate tooth remineralisation and prevent tooth demineralisation. Furthermore, this smart material reacts to acid circumstances by an increase ion exchange for extra protection.

■ GC Fuji II LC

Light-cured resin-modified glass ionomer restorative

GC FUI II LC CAPSULE SO CAPSULES SO CAPSULES FOR THE LOTTE OF THE L

Simple technique – Beautiful long-lasting results

Key advantages

- Controlled setting with the light for a straightforward & simple procedure
- Excellent aesthetics & translucency
- Outstanding proven clinical performance
- Ideal for cervical erosion / abfractions, root surface restorations & pedodontics
- Also optimal in the closed & open sandwich technique
- High chemical adhesion for a perfect marginal integrity
- Ion exchange: uptake and diffusion of ions, creating of a strong and acid-resistant tooth-material interface

Delivery

- Capsule
- Powder/Liquid

Shade Range

A1, A2, A3, A3.5, A4,
 B2, B3, B4, C2, C4, D2

"Fuji II LC is a very good material when isolation of the cavity is challenging, like for pediatric or geriatric cases. Fuji II LC also bonds optimally to dentin – even if sclerotic – making it a good choice for class V restorations, especially those caused by abrasion."

Dr Martin Hoftvedt, Norway

Courtesy of Dr Geoff Knight, Australia

Restoration of Class III pedodontic cavities using Fuji II LC

Courtesy of Dr Jamie Lucas, Australia

■ GC Fuji TRIAGE®

Low-viscosity glass ionomer protection & temporary restorative

The most polyvalent material for difficult situations Guiding the way to caries stabilisation and surface protection

Key advantages

- Moisture tolerance for easy placement, even for partially erupted molars
- Low viscosity and excellent flow for perfect sealing of deep pits & fissures
- **Bio-availability of ions** needed to prevent tooth demineralisation, assisting the tooth in **resisting to caries**
- **Go-to product for tricky situations:** kids, elderly, high caries risk, teeth with MIH...
- Available in a unique pink colour with accelerated setting and enabling an easy monitoring
- Easy removal of temporary restorations or endo-access restorations thanks to the pink colour
- Also optimal for the treatment of hypersensitivity

Delivery

- Capsule
- Powder/Liquid

Shade range

• Pink, White

"Being amongst the first users of Fuji TRIAGE in France and after so many years using it, I am still loyal to this glass ionomer. It has no equivalent and is so handy for everyday preventive dentistry."

Dr Michel Blique, France

Protection of a partially erupted molar with Fuji TRIAGE Pink

Root surface protection with Fuji TRIAGE White & a protective coating layer

Courtesy of Dr Graeme Milicich, New-Zealand

■ GC Fuji IX GP, GP FAST & GP EXTRA

High viscosity posterior glass ionomer restoratives

The proven "gold standard" Hassle-free glass ionomers for posterior cavities

Key advantages

- Condensable materials, easy to apply and to contour
- Resin-free
- **Bioactive material:** ion uptake helps to **strengthen the restoration** and increase its longevity
- Ideal to use in the closed sandwich technique & for temporary restorations
- When selective caries removal or ART technique is used; caries development can be inhibited through ion exchange
- Fuji IX GP FAST displays a **much shorter procedure** time: only 3 minutes from mixing to finishing
- Fuji IX GP EXTRA offers higher translucency

Delivery

- Fuji IX GP FAST: Capsule
- Fuji IX GP & GC Fuji IX GP EXTRA:
 Capsule & Powder/Liquid

Shade Range

- Fuji IX GP: A2, A3, A3.5, B2, B3, C4
- Fuji IX GP FAST: A1, A2, A3, A3.5, B2, B3, C4
- Fuji IX GP EXTRA: A1, A2, A3, A3.5, B1, B2, B3, C4

"Fuji IX GP EXTRA is the ultimate all-round glass-ionomer restorative material, featuring a simple procedure, the best chemical coronal seal and a high strength. Fuji IX GP EXTRA is matchless, clinically proven and remains the most versatile glass ionomer system."

Dr Akit Patel, United Kingdom

Failing amalgam restorations

■ G-COAT PLUS

Nanofilled self-adhesive light-cured protective coating

Key advantages

- Single dispersion nano-filled protective coating for glass ionomer, composite and temporary restorations
- Prevents the initial sensitivity of GICs to water
- Offers immediate surface gloss and smoothness
- Saves polishing time
- Increases strength, toughness and provides wear resistance

Fuji IX GP application

Courtesy of Dr Jamie Lucas, Australia

Application of G-COAT PLUS followed by light-curing

Courtesy of Dr Jamie Lucas, Australia

GC Conditioners

Key advantages

- Clean the surface effectively for improved adhesion
- Improve wettability & adaptation of the restorative material
- Prepare dentin & enamel for chemical adhesion without opening the dentinal tubules
- Enhance the marginal seal
- Blue tint for a controlled application

Dentin Conditioner

Polyacrylic acid cavity conditioner

Cavity Conditioner Cavity cleaning agent

• 10% polyacrylic acid with application time of 20 seconds

- 20% polyacrylic acid with application time of 10 seconds
- 3% aluminum chloride hexahydrate to seal the dentin tubules & reduce the risk of post-operative sensitivity

544500-GC-RESTORATIVE-BROCH-EN-Master.indd 10 20/02/2024 10:

■ EQUIA®

Bulk-fill long-term restorative system

The proven posterior restorative system Long-term aesthetics simplified

Key advantages

- Long-term indications thanks to the combination of a fast-setting & translucent high-viscosity material (EQUIA Fil) and a highly filled resin coating (EQUIA Coat)
- Quick and technique-tolerant permanent material
- High fracture toughness, flexural strength and flexural fatique resistance
- Increased strength of the material over time due to the **unique** maturation effect, attributed to ion uptake from saliva
- Total procedure time of only 3'30"
- The most aesthetic in its class thanks to a high translucency
- 10 years of clinical proof showing excellent success rates in posterior restorations

Delivery

- EQUIA Fil: Capsule
- EQUIA Coat: Bottle

Shade range

 A1, A2, A3, A3.5, B1, B2, B3, C4, SW

"The EQUIA restorative system is indicated for temporary and permanent restorations (small occlusal & proximal cavities) and has remarkable properties: chemical adhesion to tooth tissues, marginal seal, improved mechanical properties, technique-tolerance, fast procedure and biocompatibility."

Dr Jean-Pierre Attal, France

Courtesy of Dr Magdalena Kukurba-Setkowicz, Poland

The added advantages of glass hybrid technology

Glass hybrid systems offer the **strength of the latest innovative glasses** combined
to the **wear resistance of a filled coating**.
The unique synergy between the coating
and the restorative material **improves the durability and wear resistance** of the
restorations.

Glass Hybrids are true bulk fill materials

Glass hybrid materials are chemically cured in a short time and do not require to be placed in layers. There is no limit in the depth of cure and no shrinkage linked to the setting of the materials, making them a very safe, biocompatible solution for bulk application.

Glass Hybrids widen your options

Thanks to their resistance, glass hybrids are the only glass-based materials which offer **extended indications**. They are ideal materials for class V and **load bearing** class I & II cavities.*

Glass Hybrids are long-term restoratives

Clinical study** has shown that glass hybrids are an excellent option for **long-term posterior restorations** and for the **replacement of old amalgams**.

^{*}Please refer to Instructions For Use

^{**}Glass hybrid versus composite for non-carious cervical lesions: Survival, restoration quality and costs in randomized controlled trial after 3 years Schwendicke F, 2021

■ EQUIA Forte[™] HT

Bulk-fill glass hybrid restorative system

Cost-effective, long-term restorative alternative

Key advantages

- Excellent balance of **strength and handling** thanks to the intelligent particle distribution of **Glass Hybrid technology**
- Non-sticky consistency, perfect to be used in bulk without any bonding agent
- Smart material, increased ion exchange in acidic circumstances
- Perfect material for long-term Class I & II restorations
- Safe Bioactive treatment for deep cavities with limited post-operative sensitivity
- Excellent alternative to amalgam
- Ideal to **restore teeth affected by MIH** thanks to a great chemical adhesion even to untreated dentin

Delivery

- EQUIA Forte HT Fil: Capsule
- EQUIA Forte Coat: Bottle or Unit Dose

Shade Range

• 8 shades: A1, A2, A3, A3.5, B1, B2, B3, C4

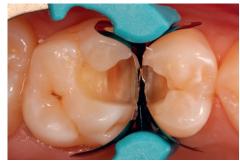

"Aesthetic, biomimetic, strong and practical... With these properties, EQUIA Forte HT provides more effective treatment options for patients with deep carious lesions in my clinical practice - without any sensitivity."

The unique strengths of composites

Composites are highly aesthetic

Composite is the best choice when looking for a highly aesthetic material for anterior restorations or demanding patients. Their translucency and light-scattering ability makes them blend naturally with the surrounding tooth structure for a perfect final outcome.

Composites are very strong

Modern composites feature high strength and are able to withstand masticatory forces. They are also developed to resist wear and to keep a smooth surface over time. Another advantage of composites is that they induce less wear to the antagonists than ceramic materials.

Composites are particularly durable

Thanks to their excellent physical properties, composite materials are **very durable** and can keep performing well **both functionally** & aesthetically on the **long term**. A **good hygienic compliance** is however needed to avoid the accumulation of plaque which can lead to secondary caries.

■ G-ænial[™] A'CHORD

Light-cured radiopaque universal composite restorativescomposite

Simplicity, Performance and Aesthetics in Your Hands. A simplified shade system with harmonious handling for long-lasting performance

Key advantages

- 5 core shades to cover all 16 V-shades, for an easy shade selection and **reduced inventory.**
- Perfect opacity for natural blending of mono-shade restorations, even without using opaque or enamel shades
- Natural fluorescence under UV and near UV light
- Brushable in anterior, sculptable in posterior, non-sticky handling thanks to a unique monomer technology
- Easy & fast polishing to high gloss thanks to the FSC technology
- Combination of 3 proprietary technologies for superior physical properties, including very high wear resistance
- Additional opaque, enamel and cervical shades for an infinite range of aesthetic possibilities
- High radiopacity of 318%Al

Shade Range

- Core shades: A1, A2, A3, A3.5, A4
- Opaque shades: AO1, AO2, AO3
- Enamel Shades: JE (Junior Enamel),
 AE (Adult Enamel)
- Chromatic & cervical shades: A5, A6
- Bleach shades: BW, BOW

"G-ænial A'CHORD has a fine handling and is easy to use. It gives much better aesthetic results in less time and effort".

Dr Helmuth Althoff, Germany

■ G-ænial Anterior **■** G-ænial Posterior

Light-cured radiopaque composite restoratives

The art of creating invisible & long-lasting aesthetics Enjoy great handling & amazing blending

Key advantages

- Effortless handling with a smooth & non-sticky
- High aesthetic level thanks to optimal lightscattering & blending
- Versatile in use: from single shade simplicity to multi-shade complexity
- Enamel selection based on the age of the patient
- Posterior version more packable & radiopaque for easy placement & follow-up

Shade Range

G-ænial Anterior:

- Standard shades: XBW (Extra Bleach White), BW (Bleach White), A1, A2, A3, A3.5, A4, B1, B2, B3, C3, CV (Cervical), CVD (Cervical Dark)
- Inside (opaque) shades: AO2, AO3, AO4
- Outside (enamel) shades: JE (Junior), AE (Adult), SE (Senior), TE (Translucent), IE (Incisal), CVE (Cervical)

G-ænial Posterior:

- Standard shades: P-A1, P-A2, P-A3, P-A3.5
- Outside (enamel) shades: P-JE (Posterior Junior), P-IE (Posterior Incisal)

"G-ænial Anterior is a wonderful material, ideally colour-tuned and easy to handle. It enables me to make perfect anterior restorations." Dr Ulf Krueger-Janson, Germany

■ G-ænial Universal Injectable

Universal high-strength restorative composite

Transform the way you work Start injecting!

Key advantages

- Indicated for all cavity classes (without any covering layer) thanks to an exceptional strength & wear resistance
- No slumping: the material **perfectly keeps its shape** thanks to an optimal thixotropy
- Easy extrusion from the syringe & not sticking to the tip for maximum comfort
- Long-lasting aesthetics thanks to excellent gloss retention and color stability
- Bendable dispensing tips for easy access to any cavity
- High radiopacity for a perfect follow-up

Shade range

16 shades in 3 translucency levels:

- Standard shades: XBW (Extra Bleach White), BW (Bleach White), A1, A2, A3, A3.5, A4, B1, B2, CV (Cervical), CVD (Cervical Dark)
- Inside (opaque) shades: AO1, AO2, AO3
- Outside (enamel) shades: JE (Junior), AE (Adult)

"G-ænial Universal Injectable is the material of choice for all restorative indications.

On top of being very easy to control, it has an exceptional strength and a perfect blending with the natural tooth tissues."

Dr Ahmed Al-Jaff, Iraq

544500-GC-RESTORATIVE-BROCH-EN-Master.indd 20 20/02/2024 10:44

■ G-ænial Universal Flo

Universal light-cured injectable composite

From the smallest Class V to the most extensive Class II restoration: controlled flow, maximum strength!

Key advantages

- Full-strength universal restorative for all classes of cavities
- Controlled flow for a **perfect adaptation**
- Optimal thixotropy for easy build-up of anatomical forms
- Outstanding gloss retention in time
- Superb aesthetics with 15 shades featuring excellent blending

Shade range

15 shades in 3 translucency levels:

- Standard shades: BW (Bleach White), A1, A2, A3, A3.5, A4, B1, B2, B3, C3, CV (Cervical)
- Inside (opaque) shades: AO2, AO3
- Outside (enamel) shades: JE (Junior), AE (Adult)

"A real flowable material for every indication – very good mechanical properties, easy to use, very nice colour and layering technique."

Dr Zbynek Mach, Czech Republic

■ G-ænial Flo X

Light-cured radiopaque flowable composite

From creating perfect linings to restoring narrow tunnel preparations: discover the foundation of perfect aesthetics!

Key advantages

- Optimal viscosity for lining and small cavities
- Great flowability for a **perfect adaptation** to cavity walls
- Easy follow-up thanks to a high radiopacity even at low thickness
- Opaque shades to mask cavity bottom discolorations
- Ergonomic syringe design for a comfortable and precise application

Shade range

8 shades in 2 translucency levels:

- Standard shades: A1, A2, A3, A3.5, A4, CV (Cervical)
- Inside (opaque) shades: AO2, AO3

"G-ænial Flo X is optimal to use together with G-ænial Posterior for cases with multiple areas of decay. It is an ideal indication, because the high radiopacity helps to detect quickly the emergence of secondary caries." Dr Frédéric Raux, France

Courtesy of Dr Per Nielsen, Switzerland

Courtesy of Dr Mark Margolin, Switzerland

■ Essentia[®] Universal

Essentia U

Universal light-cured composite

Essentia HiFlo

Composite universel photopolymérisable à fluidité élevée

Essentia LoFlo

Composite universel photopolymérisable à fluidité faible

Small Class I cavities

Courtesy of Prof Joseph Sabbagh, Lebanon

- (HiFlo, LoFlo, paste)Amazing natural blending effect
- All viscosities recommended from Class I to Class V, including occlusal cavities
- Excellent physical properties for all viscosities, even the most flowable
- Choose your **preferred handling**: HiFlo for a high wettability and flowability, and LoFlo for an excellent thixotropy
- Low inventory as one shade can be used for all posterior case

• 1 Universal shade (U)

"Minimally invasive procedures involve the design of very small cavities and in such clinical situations, flowable composites can be very useful. While Essentia HiFlo is able to penetrate the tiniest pits and fissures, Essentia LoFlo is ideal for bigger occlusal restorations thanks to its thixotropic viscosity."

Dr David Gerdolle, Switzerland

Restored with Essentia HiFlo

Non-carious lesions

Restored with Essentia LoFlo

Courtesy of Dr Bojidar Kafelov, Bulgaria

23

Essentia

Universal light-cured radiopaque composite

Open the door to simplification Discover aesthetic innovation

Key advantages

- Intuitive shade selection thanks to a simplified range of 7 shades
- High aesthetic results made simple with a duo-layering concept that aims to mimic the natural ageing of teeth
- **High gloss retention** thanks to the ultra-fine particles used in the enamel shades
- Handling of each shade optimised to its use (softer dentins, packable Universal...)
- Low inventory: **only 7 syringes** for all your cases
- Characterisation possible with Essentia Modifiers for high-end aesthetic

Shade Range

- 3 Dentins: Light (LD), Medium (MD), Dark (DD) for a perfect blending
- 2 Enamels: Light (LE), Dark (DE) for optimal translucency & opalescence
- 1 Universal (U) for posterior mono-shade restorations
- 1 Masking Liner (ML) to conceal discolorations
- 4 Modifiers (Opalescent OM, Black BM, White WM, Red-Brown RBM) for special effects

"Emulating nature with composite is a difficult challenge, however with Essentia it becomes a simple task: just focus on properly shaping dentin and enamel and the material will do the rest for you. A truly smart system."

Dr Javier Tapia Guadix, Spain

■ GRADIA® DIRECT Anterior ■ GRADIA DIRECT Posterior **■** GRADIA DIRECT X

Light-cured composite restoratives

One shade simplicity and aesthetic invisibility – proven

Key advantages

- Invisible natural aesthetics thanks to superb chameleon effect
- Clinically proven over more than ten years
- Excellent handling featuring easy placement & shaping and a long working time
- Optimal for both **single-shade and multi-shade** restorations
- Available in **Anterior and Posterior** versions, as well as **GRADIA DIRECT X** featuring a higher radiopacity

"The predictability, ease of adaptation & sculpting and proven quality of GRADIA DIRECT make it possible to achieve the reliability and aesthetics that my patients expect." Dr Michał Szewczyk, Poland

Shade range

GRADIA DIRECT Anterior:

- Standard: XBW (Extra Bleach White), BW (Bleach White), A1, A2, A3, A3.5, A4, B1, B2, B3, C3, CV (Cervical), CVD (Cervical Dark)
- Inside (opaque): AO2, AO3, AO4
- Outside (translucent): DT (Dark), CT (Clear), GT (Gray), NT (Natural), WT (White), CVT (Cervical)

GRADIA DIRECT Posterior:

- Standard: P-A1, P-A2, P-A3, P-A3.5
- Outside (translucent): P-WT (Posterior White), P-NT (Posterior Natural)

GRADIA DIRECT X:

 X-A1, X-A2, X-A3, X-A3.5, X-AO2, X-WT (White Translucent)

GRADIA DIRECT FloGRADIA DIRECT LoFlo

Light-cured flowable composites

Aesthetic hybrid microfilled composites for simple restorations

Key advantages

- Two viscosities to cover many indications:
 - GRADIA DIRECT Flo (highly flowable) is optimal for **lining**, **undercuts or enamel imperfections**
 - GRADIA DIRECT LoFlo (high viscosity flowable) is perfect to achieve a stable placement without slumping
- Highly filled composites for superior strength and wear resistance
- Clinically proven over more than ten years
- Combining ease of use & natural aesthetics

Shade range

- Standard shades: BW (Bleach White), A1, A2, A3, A3.5, CV (Cervical)
- Inside (opaque) shade: AO3

"Versatile and effective, GRADIA DIRECT Flo displays an excellent wettability and great ability to fill the smallest gaps, without being too flowable. Its application can thus be fully controlled, both at the cavity bottom (avoiding the risk of voids) and when creating splints or sealing fissures."

Dr Laurent Viard, France

Preparation

After application of GRADIA DIRECT LoFlo

Recall situation

GRADIA CORE

Dual-cure composite for core build-up & post cementation

Complete system for aesthetic core build-up and post luting in only one appointment

Key advantages

- Optimal thixotropy: **flows under pressure** for post luting, **stays in shape** for core build-up without using pre-forms
- Easy procedure with limited steps for a one-appointment realisation
- Cutting feeling similar to dentin, for an **easier finishing** and **smooth edges**
- Strong enough to resist the occlusal pressure thanks to a 75% filler load
- Modulus of elasticity close to dentin, to naturally distribute the stress in the tooth structure
- Secured adhesion thanks to a combination of dual-cure and contact-cure

Shade range

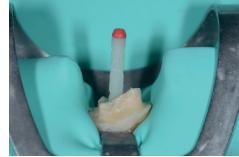

• One universal shade

"Working with GRADIA CORE is extremely easy as it can be used both to lute posts and to create the core build-up, thereby making the restoration strong & monolithic. It is also time & cost-saving as everything can be done using the same mixing tip! Additionally, the hardness of the set material is very close to that of dentin, therefore it's easy to prep the stump for indirect restorations without creating grooves at the interface between the tooth structure and the core material."

Dr Rosen Venelinov, Bulgaria

■ everX FlowTM

Short-fibre reinforced flowable composite for dentin replacement

Strong to the core The toughest composite substructure to reinforce your restorations

Key advantages

- Optimal to strengthen large restorations thanks to the reinforcing effect of fibres
- Excellent fracture toughness reducing the risk of catastrophic failures
- Perfect thixotropy for an easy placement & adaptation
- No slumping even in upper molars
- Quick procedure when using the Bulk shade (with a layer thickness up to 5,5mm)
- Excellent aesthetic results with the Dentin shade (in layers of 2mm)
- Indicated both for **dentin replacement** and for **core build-up** preparations

Shade range

- **Dentin** shade
- Bulk shade (Translucent)

"Flowable, easy to use and biomimetic, everX Flow is a unique restorative material able to emulate both dentin and dentino-enamel junction (DEJ) by providing the elasticity and toughness of dentin and the unique stress-breaking property of the DEJ."

Dr Mark Frater, Hungary

Cavity preparation

Application of everX Flow (Dentin shade)

Final layer with Essentia (Universal shade)

Post-operative situation

Courtesy of Dr Georg Benjamin, Germany

everX Posterior®

Fibre-reinforced composite for dentin replacement

Discover the power of fibres... The strongest composite substructure – extending the limits of direct restorations

Key advantages

- Optimal for dentin replacement in large cavities thanks to the reinforcing effect of fibres
- Fracture toughness equivalent to dentin and almost double that of other composites
- Designed to redirect or arrest crack propagation, thus reducing the risk of catastrophic failures
- Perfect bond to overlaying composite layer (always required) and to the tooth structure
- Compatible both with layering and bulk application up to 4mm
- Widens the direct restorative options, offering an economic alternative to inlays/onlays

Shade range

• One universal shade (Translucent)

"Easy, fast and biomimetic, everX Posterior is the first restorative material able to emulate both dentin and dentino-enamel junction (DEJ) by providing the elasticity and toughness of dentin and the unique stress-breaking property of the DEJ."

Dr Mark Frater, Hungary

544500-GC-RESTORATIVE-BROCH-EN-Master.indd 32 20/02/2024 10

Which bonding for which indication?

Simplicity in bonding with 1 bottle?

1 bonding for all indications?

Easy dispensing with touch cap bottle?

Separate primer and bonding with hydrophobic properties? Thick bonding layer for stress absorption in posterior restorations?

Ideal product for the IDS technique?

Choose a universal single bottle system

Choose a universal multi bottle system

G-Premio BOND

One-component light-cured universal adhesive

Discover GC's universal bonding agent: zero compromises on performance – zero compromises on manipulation

Key advantages

- Compatible with all etching techniques (self-etch, selective etch or total-etch)
- Indicated for direct bonding, but also for hypersensitivity treatment & repair cases
- Optimal performance on different substrates thanks to 3 functional monomers (4-MET, MDP & MDTP)
- Extremely thin film thickness (3µm) for very **low chances of discoloration**
- No post-operative sensitivity thanks to an excellent penetration into dentinal tubules
- Very **easy procedure** with low technique sensitivity
- No waste thanks to a long working time and a thin nozzle delivering up to 300 drops per bottle

Delivery modes

- Bottle
- Unit Dose

"Predictable bonding to dental substrates has long been an onerous and technique-sensitive task.

G-Premio BOND has eliminated these issues for all direct and indirect procedures. It truly is a fantastic material."

Dr Serhat Köken, Turkey

Selective etching of enamel

Dispensing of G-Premio BOND

Application of G-Premio BOND

Invisible bonding layer

G2-BOND Universal All-round 2-bottle Universal Bonding

Leading the way to a new standard The new standard of 2-bottle Universal Bonding

Key advantages

- Your choice of preferred etching mode
- Superior durability and bond strength, thanks to a HEMA free formulation
- Superior resistance to marginal staining
- Optimal film thickness & flexural strength which can provide shock absorbing features
- Easy handling and low technique sensitivity
- Multiple indications from direct restorations to the IDS technique
- Modern, intelligent and ergonomic design

Delivery modes

• 2-BOND 5mL Bottle

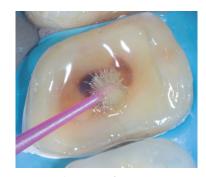

Dr Dimitrios Spangopoulos, Greece

Total etching of the tooth structure

Immediate Dentin Sealing Technique

Application of 1-PRIMER

Application of 2-BOND and light-curing

A flowable composite is applied and the sealed dentin is ready for digital impression.

544500-GC-RESTORATIVE-BROCH-EN-Master.indd 35 20/02/2024 10:44

■ G-ænial Bond

One-component self-etching light-cured adhesive

Key advantages

- Compatible with both **self-etch** and **selective etch** techniques
- Long-lasting bond strength to both enamel & dentin
- Excellent marginal integrity in time, proven in independent tests
- No post-operative sensitivity as dentin is not etched

Delivery

Bottle

Optional selective enamel etching

Application of G-ænial Bond

Courtesy of Dr Stanisław Lassociński, Poland

■ G-BOND[™]

One-component self-etching light-cured adhesive

Key advantages

- True one-bottle system with a one-step application
- Very easy & fast procedure with low technique sensitivity
- Extensive clinical proof showing superior performance in time
- Mild etching effect & HEMA-free composition for the **best durability**

Delivery

- Bottle
- Unit Dose

Final restorations

Cure. Protect. Detect... See the invisible with D-Light Pro's Detection Mode

Key advantages

- Wide emission range to **efficiently polymerise all materials**, regardless of the initiator
- High Power mode to have the highest curing efficiency for all routine cases
- Low Power mode optimal to **limit heat generation** when close to the pulp
- Detection mode based on violet light to **visualise active plaque**, **micro-leakage**, **old restorations**...
- Effortless handling & maximum comfort thanks to a light and thin handpiece
- Autoclavable handpiece & light-guide for **optimal hygiene**

Technical characteristics

Wavelength range

- Peaks at 400-405nm & 460-465nm
- Polymerisation of visible light curing materials curing with a wavelength range of 400 to 480nm

Power output

- High Power mode: 1400mW/cm²
- Low Power mode: 700mW/cm²

"The additional visual information you get while using the Detection mode of D-Light Produring examination, caries excavation, composite removal and even composite reconstruction is a valuable bonus to the curing modes."

Dr Stephane Browet, Belgium

Detection of active plaque

Detection of micro-leakage

Detection of fluorescent restorations

everStick® Fibre reinforcements

Minimally invasive & patient-friendly fibre reinforcement solutions for daily dentistry

Key advantages

- Minimally invasive and reversible solutions, leaving all options open for future treatments
- Extensive clinical proof & in vitro research available
- Superior mechanical properties
- Unique patented bonding with IPN (Interpenetrating Polymer Network) technology
- Economical alternative to indirect treatments

Indications

- Fibre-reinforced composite **bridges**
- Advanced root canal **post & core** structures
- Splints of mobile and traumatised teeth
- Orthodontic retainers

"I hear dentists say that working with fibres is difficult. They probably never tried everStick... It's instant, easy to handle, extremely durable under load and enables to treat patients in a minimally invasive way. What else can you ask for?"

Dr Rudolf Novotny, Slovakia

■ NEW METAL STRIPS

Interproximal finishing strips

Key advantages

- Very thin, flexible & resistant material
- Autoclavable & easy to clean
- 4 different grits (Extra Coarse, Coarse, Medium, Fine)

EPITEX

Finishing & polishing strips

Key advantages

- Very thin, flexible & resistant material
- Handy dispensing system
- 4 different grits (Coarse, Medium, Fine, Extra Fine) & matrix strips

Using EPITEX (Medium Grit) to finish the interproximal areas

Courtesy of Dr Javier Tapia Guadix, Spain

DIAPOLISHER PASTE

Diamond polishing paste for composite & porcelain

Key advantages

- Optimal to quickly achieve final high luster
- Effective in avoiding plaque attachment and discolorations
- Easy to wash away with water
- Nice minty flavor for patient comfort

GC Modeling Liquid

Liquid to model composite materials for direct restorations

Key advantages

- Simplifies the **application & shaping** of direct composites
- Provides a smoother aspect to the last layer
- Invisible to achieve the best aesthetic results

Applying Essentia composite using a brush wetted with GC Modeling Liquid

Courtesy of Dr Javier Tapia Guadix, Spain & Prof Marleen Peumans, Belgium
