from GC.

Radiopaque glass ionomer  
surface protection material

## GC Fuji TRIAGE Radiopaque glass ionomer protection and stabilisation material

1. The fissure seal time bomb. Geoff Knight. Dental Town Magazine, July 2002, p.23
2. An in-vitro evaluation of the surface protective properties of Fuji VII on enamel and dentine. M. Dalidjan, H. Ngo, M. Fraser, JM. McIntyre. Abstract P5 – IADR, October 2002, Sydney, Australia.
3. Antibacterial effect of various glass ionomers. M.C. Peters, M. Jimenez, G.E. Poort, J.C. Fenno. Abstract 0415 - 80<sup>th</sup> General Session of the IADR, 2002, San Diego, USA.
4. Microleakage measurements by Digital Imaging of thermocycled esthetic restorative materials. R.W. Laverdiere, L.D. Bragg, S.S. Khajotia, T.J. Fruits, M.G. Duncanson. Abstract 3399 – 80<sup>th</sup> General Session of the IADR, 2002, San Diego, USA.
5. Comparison of the acid-resistance level of the dentine surface immersed with fluoride-releasing materials in artificial saliva. T. Noguchi, S. Kato, S. Akahane. Abstract 1986 – 81<sup>st</sup> General Session of the IADR, 2003, Göteborg, Sweden.
6. Effect of heat activation on setting times of glass ionomers. J.D. Astroth, K. Naasz, R.G. Berg, J.W. Stansbury. Abstract 1983 - 81<sup>st</sup> General Session of the IADR, 2003, Göteborg, Sweden.
7. Interaction of conventional glass-ionomer cements with hydrated dentin. C.K.Y. Yiu, F.R. Tay, N.M. King, D.H. Pashley, S.K. Sidhu, J. Neo, M. Toledano, A. Wong. Abstract 0719 - 81<sup>st</sup> General Session of the IADR, 2003, Göteborg, Sweden.
8. How to reduce composite polymerization shrinkage associated with direct posterior composites. G. Milicich. Dental Town Magazine, April 2003
9. Reversal of caries using airabrasion and ozone – Nine month results. C.P.S. Clifford. Abstract 3467 – 82<sup>nd</sup> General Session of the IADR, 2004, Honolulu, Hawaii.
10. Reversal of occlusal caries using air abrasion, ozone, and sealing. J. Holmes and E. Lynch. Abstract 3468 - 82<sup>nd</sup> General Session of the IADR, 2004, Honolulu, Hawaii.
11. Penetration of various pit and fissure sealants into occlusal grooves. D.A. Covey, W.W. Johnson and L.R. Hopper. Abstract 3471 - 82<sup>nd</sup> General Session of the IADR, 2004, Honolulu, Hawaii.
12. Efficacy of Fuji 7 in preventing pits & fissures caries in Indonesian children. I. Adyatmaka, A. Adyatmaka, H.C. Ngo. Abstract IO-48 – 20<sup>th</sup> IADR (South-East Asian Division) Meeting, September 1-4, 2005, Melaka.
13. Microtensile bond strength to ground enamel by glass-ionomers, resin-modified glass-ionomers, and resin composites used as pit and fissure sealants. F. Papacchini, C. Goracci, F. Tranchesi Sadek, F. Monticelli, F. Garcia-Godoy, M. Ferrari. Journal of Dentistry (2005) 33, 459-467.
14. Retention of surface protectant sealants on contaminated enamel surface. J. Wanuck, S. Antonson, D.E. Antonson and B. De Santis. Abstract 1729 - IADR, March 2005, Baltimore, Maryland, USA \*

15. R.S. Callan, D.C.N. Chan, W.D. Browning, M.C. Downey and R.M. Pohjola. Evaluation of microleakage into fissure system sealed with triage. Abstract 2991 - IADR, March 2005, Baltimore, Maryland, USA \*
16. Ion-Transfer patterns across a thin film of set glass-ionomer: Fuji 7. H.C. Ngo, J. Mc Intyre and G. Mount. Abstract 3058 - IADR, March 2005, Baltimore, Maryland, USA\*
17. At last, surface protection for newly erupting first molars. S.A. Anthonson, J. Wanuck, D.E. Anthonson. Compendium, Vol.27, N°1, January 2006.
18. Microleakage around GIC and resin-based sealants. W.W. Johnson, D.A. Covey, L. Hopper. Abstract 310 - IADR, March 2006, Orlando, Florida, USA.
19. Effects of pulp capping materials on mechanically exposed primate pulps. I. Gerodias, M. Cannon, R. Jurado, A.E.M. Vieira, C. Percinoto. Abstract 937 - IADR, March 2006, Orlando, Florida, USA
20. An evaluation of glass ionomer-based restorative materials as temporary restorations in endodontics. K.B. Seiler. General Dentistry, January-February 2006.
21. Chlorhexidine release from glass ionomer cements. A. Dadhe, P. Ashley, G. Palmer. Abstract 020 - 8<sup>th</sup> Congress of the EAPD, Amsterdam 8-11 June 2006.
22. Fuji VII permits remineralization of demineralized tooth root dentine in vitro. M.Dalidjan, R. Nayak, J.M. McIntyre, H. Ngo. Abstract 665 - IADR, June 28-July 1 2006, Brisbane, Australia
23. Strategies for addressing restorative challenges in older patients. J.M. Chalmers. JCDA, June 2006, Vol.72, N°5 \*
24. Surface protection fro newly erupting first molars. S.A. Antonson, J. Wanuck, D.E. Antonson. Compendium, January 2006 Vol.27 N°1 \*
25. Ion uptake into demineralized dentine from glass ionomer cement following pretreatment with silver fluoride and potassium iodide. G.M. Knight, J.M. McIntyre, G.G. Craig, Mulyani. Australian Dental Journal 2006;51:3 237-241
26. Caries-preventive effect of resin-based and glass ionomer sealants over time: a systematic review. N. Beiruti, J.E. Frencken, M.A. van 't Hof, W.H. van Palenstein Helderman. Community Dental Oral Epidemiol 2006; 34: 403-409
27. Comparison between effectiveness of a low-viscosity glass ionomer and a resin-based glutaraldehyde containing primer in treating dentine hypersensitivity - a 25.2-month evaluation. R.N. Polderman, J.E. Frencken. Journal of Dentistry 35 (2007) 144-149.
28. The effect of thermocycling on a colored glass ionomers intracoronal barrier. S.M. Maloney, S.B. McClanahan, G.G. Goodell. JOE, Volume 31, Number 7, July 2005.
29. The use of glass ionomer sealants on newly erupting permanent molars. R.G. Lindemeyer. JCDA, March 2007, Vol.73, No.2 \*
30. Potential inhibition of demineralization in vitro by fluoride-releasing sealants. D.V. Salar, F. García-Godoy, C.M. Flaitz, M.J. Hicks. JADA, Vol.138, April 2007 \*
31. Electron probe microanalysis of ion exchange of selected elements between dentine and adhesive restorative materials. G.M. Knight, J.M. McIntyre, G.G. Craig, Mulyani. Australian Dental Journal 2007;52:2 \*
32. An in vitro investigation of marginal dentine caries abutting composite resin nand glass ionomer cement restorations. G.M. Knight, J.M. McIntyre, G.G. Craig, Mulyani, P.S. Zilm, N.J. Gully. Australian Dental Journal 2007;52(3):187-192 \*

33. Shear Bond Strength of a New High Fluoride Release Glass Ionomer Adhesive. Samir E. Bishara, Manal Soliman, John F. Laffoon, John Warren. *Angle Orthodontist*, Vol 78, No 1, 2008, 125-128
34. Compressive Strength, Surface Roughness, Fluoride Release and Recharge of Four New Fluoride-releasing Fissure Sealants. Sule KAVALOGLU CILDIR and Nuket SANDALLI. *Dental Materials Journal* 26(3) 2007: p335-341, 2303057
35. Clinical evaluation of Glass-ionomer fissure sealants, 12th Congress of the BaSS, 2007
36. Depth of Penetration of Fissure Sealants Based on Fissure Configuration S.A. Antonson, E. Kilinc and D.E. Antonson, Nova Southeastern University, Fort Lauderdale, FL, USA, 2Ege University, Izmir, Turkey. Abstract 2447 – IADR – March 2007.
37. Composite (COM) versus Glass-Ionomer (GIC) Sealants. A Two-Year Prospective Clinical Split-Mouth Study. K.A. Schulze, K.R. Jahn, J. Verre, R. Wilson and M. Geissberger. Abstract 1579 – IADR – March 2007.
38. The Influence of Light-Curing on Microhardness of Pink-Coloured Glass-Ionomer Cement. B. CZARNECKA, P. DEREGOWSKA-NOSOWICZ, E. PASZYNSKA, M. PRYLINSKI, and H. SHAW, University of Medical Sciences in Poznan, Poland. Abstract 0034 – IADR – Sept 2006, Dublin, Ireland.
39. Interaction of Glass-ionomer Cements with Moist Dentin. C.K.Y. Yiu, F.R. Tay, N.M. King, D.H. Pashley, S.K. Sidhu, J.C.L. Neo, M. Toledano, S.L. Wong. *Journal of dental research* 83 (4) 2004. p 283 – 289.
40. Fluoride content and recharge ability of five glassionomer dental materials. D.L. Merkovic, B.B. Petrovic and T.O. Peric. *BMC Oral Health* 2008, r:21 doi:10.1186/1472-6831-8-21
41. Caries risk reduction in patients attending a caries management clinic. A; Sbaraini, R.W. Evans. *Australian dental Journal* 2008; 53:340-348
42. Fluid flow evaluation of Fuji Triage and gray and white ProRoot mineral trioxide aggregate intraorifice barriers. A.D. John, T.D. Webb, G. Imamura and G.G. Goodell. *JOE – Volume 34, Number 7, July 2008*
43. Status of Oral Health and Maintenance of Sealants in Mentally Retarded Patients: A 2-Year Clinical Program. E. Paszynska, J. Jurga, M. Dyszkiewicz-Konwinska, K. Mehr. Abstract 132 – 56<sup>th</sup> ORCA Congress - Caries 240 Res 2009;43:179-244.
44. Técnica de restauración atraumática (A.R.T.) en la odontología de mínima intervención. J.I. Zalba. *Labor Dental - Vol. 10 - nº 4 7-8/2009*
45. Clinical Evaluation of Glass-Ionomer Material for Fissure Sealing: 36-Months Results. T. Peric, D. Markovic and B. Petrovic. Abstract 343 – EADR 2009, München, Germany
46. Fuji III vs. Fuji VII Glass Ionomer Sealants -A Clinical Study. B.K. Kamala, M.H. Amitha. *The Journal of Clinical Pediatric Dentistry*, Vol. 33, Nº1, 2008
47. The Effect of Sealant Types on Demineralization of Surrounding Enamel. A. Alsaffar, R. Feigal, D. Tantbirojn and S. Beiraghi. Abstract 1097 – IADR 2009 Miami, USA
48. The effect of silver fluoride and potassium iodide on the bond strength of auto cure glass ionomer cement to dentine. G.M. Knight, J.M. McIntyre, Mulyani. *Australian Dental Journal* 2006;51: (1):42-45
49. Enhancement of fluoride release from glass ionomer cement following a coating of silver fluoride. Z. Ariffin, H. Ngo, J. McIntyre. *Australian Dental Journal* 2006;51: (4):328-332

50. Clinical study on surface protection for newly-erupting molars: 2-year results. S. Antonson, S. Brener, J. Crutchfield, D. Antonson, C. Michaud, S. Alempour and D. Evans. Abstract 404 – IADR 2010, Barcelona, Spain
51. Effect of saliva contamination on microleakage of different fissure sealants. M. Öz, and S. ARAS. Abstract 625 – IADR 2010, Barcelona, Spain
52. Time dependent changes in microhardness of pit and fissure sealants. A. Garcia, I. Soler, R. Triana, J. Ellakuria, I. Sanchez, F. Calvo and J. Goiriena. Abstract 2321 – IADR 2010, Barcelona, Spain
53. Clinical study on sealant marginal-integrity for newly-erupting molars: 2-year results. S. Antonson, S. Brener, J. Crutchfields, D. Antonson, S. Alempour, C. Michaud, D. Evans. Abstract 4536 – IADR 2010, Barcelona, Spain
54. The incorporation of casein phosphopeptide–amorphous calcium phosphate into a glass ionomer cement. H. Al Zraikat, J.E.A. Palamara, H.H. Messer, M.F. Burrow, E.C. Reynolds. *Dental Materials* 27 (2011) 235-243
55. Glass ionomer cement and resin-based fissure sealants are equally effective in caries prevention. S. Sachin. *J Am Dent Assoc* 2011: 142;551-552
56. Effect of glass ionomer sealant in newly erupted first molars. M.K. Zabad. Abstract 3023 – IADR 2011, San Diego, USA
57. The effect of aging on the fracture toughness of esthetic restorative materials. R. Bagheri, M.R. Azar, M.J. Tyas, M.F. Burrow. *American Journal of Dentistry*, Vol.23, No3, June 2010
58. Effect of glass-ionomer cement on the progression of proximal caries. C. Trairatvorakul, S. Itsaraviriyakul, W. Wiboonchan. *J Dent Res* 90(1):99-103, 2011
59. Fluoride release and absorption at different pH from glass-ionomer cements. M.G. Gandolfi, S. Chersoni, G.L. Acquaviva, G. Piana, C. Prati, R. Mongiorgi. *Dental Materials* (2006) 22, 441–449
60. Case series: Clinical findings and oral rehabilitation of patients with amelogenesis imperfect. D. Markovic, B. Petrovic, T. Peric. *European Archives of Paediatric Dentistry* // 11 (Issue 4). 2010
61. Twenty-four month clinical evaluation of fissure sealants on partially erupted permanent first molars: Glass ionomer versus resin-based sealant. S.A. Antonson, D.E. Antonson, S. Brener, J. Crutchfield, J. Larumbe, Ch. Michaud, A. Rüya Yazici, P.C. Hardigan, S. Alempour, D. Evans, R. Ocanto. *JADA* 2012;143;115-122
62. Randomized clinical trial on effectiveness of silver diamine fluoride and glass ionomer in arresting dentine caries in preschool children. Qing Hui Zhi, Edward Chin Man Lo, Huan Cai Lin. *Journal of dentistry* 40(2012) 962 – 967
63. Sealant Penetration and Adaptation in Contaminated Fissures: A SEM Study. A.M. Aljobair. Abstract 2311 – IADR Brazil 2012
64. Microstructure of Adhesion of Pit and Fissure Sealants. J. Simancas, N. Aguilera de Simonovis. Abstract 1347 – IADR Brazil 2012
65. Retention Loss of Resin Based Fissure Sealants - a Valid Predictor for Clinical Outcome? S. Mickenautsch, Veerasamy Yengopal. *The Open Dentistry Journal*, Volume 7, 2013
66. Dentin Remineralisation Effect of Novel GIC Incorporating Calcium and Phosphate. T. Suda, F. Fusejima, T. Sakuma. Abstract 3081 – IADR Seattle 2013
67. Caries Preventive Effect of Glass Ionomer Sealant in Primary Molars. A. Phonghanyudh, O. Boonyakiati, and S. NakornchaI. Abstract 458 – IADR Firenze 2013, Italy

68. The success rates of a glass ionomer cement and a resin-based fissure sealant placed by fifth-year undergraduate dental students. T. Ulusu, M.E. Odabaş, T. Tüzüner, Ö. Baygın, H. Sillelioğlu, C. Deveci, F.G. Gökdoğan, A. Altuntaş. *European Archives of Paediatric Dentistry*, Vol. 13, N° 2, 2012
69. Clinical and radiological evaluation of ter haar syndrome: case report of a patient with extreme longevity. E. Haznedaroglu, I. Tanboga, S. Sozkes.. *The Journal of Rare Disorders* 2 (2014) 15-17
70. Scanning electron microscope and microhardness evaluation of gic sealant application after different enamel treatment procedures. E. Haznedaroglu, A. Montes. *J Dent Fac Atatürk Uni*
71. In Vitro Evaluation of Microleakage Under a Glass Ionomer Surface Protector Cement After Different Enamel Treatment Procedures. E. Haznedaroglu, A. R Montes, I. Tanboga. *OHDm*, Vol. 11, N° 1, 2012
72. Dental sealants: comparison of different materials in a prospective, controlled, split-mouth clinical trial. M. Basso, M.G. Benites, P. Khandelwal, M. Turqui. Abstract No. 0188. ConsEuro 2015.
73. Clinical effectiveness of contemporary adhesives for the restoration of non-carious cervical lesions. A systematic review. M. Peumans, J. De Munck, A. Mine, B. Van Meerbeek. *Dental materials* 30 (2014), pp. 1089-1103.
74. Evaluation of adhesion of a CPP-ACP modified GIC to enamel, sound dentine, and caries-affected dentine. H. Koizumi, H.H. Hamama & M.F. Burrow. *International Journal of Adhesion & Adhesives*, 66(2016), pp. 176–181.
75. Casein Phosphopeptide-Amorphous Calcium Phosphate Reduces Streptococcus mutans Biofilm Development on Glass Ionomer Cement and Disrupts Established Biofilms. S.G. Dashper, D.V. Catmull, S-W Liu, H. Myroforidis, I. Zaluzniak, J.E.A. Palamara, N.L. Huq & E.C. Reynolds. *PLoS ONE* 11(9): e0162322. doi:10.1371/journal.pone.0162322.
76. Glass-ionomer fissure sealants: Clinical observations up to 13 years. D. Markovic, T.Peric, B. Petrovic. *Journal of Dentistry* 79 (2018) 85–89
77. Bacterial adhesion on fissure sealants: Effects of exposure to acidic drink. M. Colombo, A. Dagna, D. Molino, C. Poggio, D. Maiolatesi, G. Pietrocola. *J Clin Exp Dent*. 2018 Jun 1;10(6):e574-e578. doi: 10.4317/jced.54818. eCollection 2018 Jun
78. Retention and caries-preventive effect of glass ionomer and resin-based sealants: An 18-month-randomized clinical trial. A. AL-JOBAIR, N. AL-HAMMAD, S. ALSADHAN, F. SALAMA. *Dental Materials Journal* 2017; 36(5): 654–661
79. Fluoride ion release/recharge behavior of ion-releasing restorative materials. M.A. Heiss, Y. Hokii, C. Carey, G. Joshi. Poster, ADM Wyoming, USA, October 2019
80. Evaluation of Sealant Penetration in Relation to Fissure Morphology, Enamel Surface Preparation Protocol and Sealing Material. D.L. Markovic, B.B. Petrovic, T.O. Peric, D. Trisic, S. Kojice, B.L. Kuljic, G. Stojanovic. *Oral Health Prev Dent* 2019; 17: 349–355. doi: 10.3290/j.ohpd.a42689
81. Zinc Incorporated Into Dentin Improves Its Acid Resistance. K. Naito et al. *J Dent Res J Dent Res Vol 99 (Spec Iss A): 0176*, <https://iadr2020.zerista.com/event/member/676497>, 2020
82. Anti-biofilm Effects of Glass Ionomer Cement Containing BioUnion Filler. T. Kohno et al. *J Dent Res J Dent Res Vol 99 (Spec Iss A): 0763*, <https://iadr2020.zerista.com/event/member/677874>, 2020

83. Release and Recharge of Fluoride, Calcium and Strontium Releasing Materials, M. Heiss et al. *J Dent Res J Dent Res Vol 99 (Spec Iss A)*: 1784, <https://iadr2020.zerista.com/event/member/677412>, 2020
84. Role of Glass Ionomer with CPP-ACP in Secondary Caries Formation: In Vitro Study. J. Hicks, C. Flaitz. *J Dent Res J Dent Res Vol 99 (Spec Iss A)*: 1777, <https://iadr2020.zerista.com/event/member/677405>, 2020
85. Antibacterial activity of selected glass ionomer cements. E. Łuczaj-Cepowicz, G. Marczuk-Kolada, A. Zalewska, M. Pawińska, K. Leszczyńska. *Postepy Hig Med Dosw (online)*, 2014; tom 68: 23-28
86. Case report of a novel interim approach to prevent early posteruptive enamel breakdown of molar-incisor hypomineralization-affected molars. S. Bagattoni, I. Gozzi, L. Lardani, G. Piana, A. Mazzoni, L. Breschi, C. Mazzitelli. *JADA* 2021;152(7):560-566  
<https://doi.org/10.1016/j.adaj.2021.04.015>
87. Qualification of Ion-Exchanges With Bioactive GIC Restoration on Root Caries. G. Davis, H. Chen, D. Mills, A. Baysan. O032 – PER-IADR Marseille September 2022
88. Clinical comparison of Fuji VII and a resin sealant in children at high and low risk of caries. Xiao xian CHEN1 and Xing gang LIU. *Dental Materials Journal* 2013; 32(3): 512–518 <https://doi.org/10.4012/dmj.2012-300>
89. Heat-treated glass ionomer cement fissure sealants: Retention after 1 year follow-up. Skrinjaric, K., Vranic, D. N., Glavina, D., & Skrinjaric, I. (2008). *International Journal of Paediatric Dentistry*, 18(5), 368–373.  
<https://doi.org/10.1111/j.1365-263X.2007.00896.x>
90. Retention of a resin-based sealant and a glass ionomer used as a fissure sealant: A comparative clinical study. Subramaniam, P., Konde, S., & Mandanna, D. (2008). *Journal of Indian Society of Pedodontics and Preventive Dentistry*, 26(3), 114–120. <https://doi.org/10.4103/0970-4388.43192>
91. Sealants revisited: An efficacy battle between the two major types of sealants-A randomized controlled clinical trial. Prathibha, B., Reddy, Pp., Anjum, M., Monica, M., & Praveen, B. H. (2019). *Dental Research Journal*, 16(1), 36–41. <https://doi.org/10.4103/1735-3327.249551>
92. Retention and caries-preventive effect of glass ionomer and resin-based sealants: An 18-month-randomized clinical trial. Al-Jobair, A., Al-Hammad, N., Alsadhan, S., & Salama, F. (2017). *Dental Materials Journal*, 36(5), 654–661. <https://doi.org/10.4012/dmj.2016-225>
93. Clinical evaluation of Fuji VII sealant material. Ganesh, M., & Tandon, S. (2006). *Journal of Clinical Pediatric Dentistry*, 31(1), 52–57.  
<https://doi.org/10.17796/jcpd.31.1.w8532743883hw64n>
94. A two-year clinical evaluation of glass ionomer and ormocer based fissure sealants. Guler, C., & Yilmaz, Y. (2013). *Journal of Clinical Pediatric Dentistry*, 37(3), 263–268. <https://doi.org/10.17796/jcpd.37.3.38761uwwm7kpi616>
95. Clinical evaluation of glass ionomer for pit and fissure sealing of fully erupted molars. Sly, E. G., Kaplan, A. E., & Missana, L. (2010). *Acta Odontológica Latinoamericana : AOL*, 23(1), 3–7.  
<https://www.ncbi.nlm.nih.gov/pubmed/20645635>
96. Retention and remineralization effect of moisture tolerant resin-based sealant and glass ionomer sealant on non-cavitated pit and fissure caries: Randomized controlled clinical trial. Alsabek, L., Al-Nerabieah, Z., Bshara, N., & Comisi, J. C. (2019). *Journal of Dentistry*, 86, 69–74.  
<https://doi.org/10.1016/j.ident.2019.05.027>

97. Glass Ionomer Sealant versus Fluoride Varnish Application to Prevent Occlusal Caries in Primary Second Molars among Preschool Children: A Randomized Controlled Trial. Lam, P. P. Y., Sardana, D., Luo, W., Ekambaram, M., Lee, G. H. M., Lo, E. C. M., & Yiu, C. K. Y. (2021). *Caries Research*, 55(4), 322–332. <https://doi.org/10.1159/000517390>
98. Management of mucosal fenestration with external root resorption by multidisciplinary approach. Bharti, R., Chandra, A., Tikku, A. P., Prasad, V., Shakya, V. K., & Singhal, R. (2014). *BMJ Case Reports*, 2014, bcr2014206259. <https://doi.org/10.1136/bcr-2014-206259>
99. Effect of Ion-Releasing Materials on Dentine Surface Microhardness and Appearance. I. Šalinović, F. Schwendicke, H. Askar, J. Yassine, I. Miletic. Abstract O030, PER-IADR Marseille, September 2022
100. Effect of Ultrasound on Setting Reaction and Microhardness of GIC. D. ALModdahi, B. Alshehri, S. Shahid, N. Karpukhina. Abstract P279, PER-IADR Marseille, September 2022
101. Qualification of Ion-Exchanges With Bioactive GIC Restoration on Root Caries. G. Davis, H. Chen, D. Mills, A. Baysan. Abstract O032 - PER-IADR Marseille, September 2022
102. Pan, Y., Zhou, H., Mei, L., & Li, Q. (2016). Clinical evaluation of glass ionomer and resin-based sealant on partially erupted permanent first molars. *JOURNAL OF WEZHOU MEDICAL UNIVERSITY*, 46(2), 122–125. <https://xb.wmu.edu.cn/EN/abstract/abstract536.shtml>
103. Uzel, I., Gurlek, C., Kuter, B., Ertugrul, F., & Eden, E. (2022). Caries-Preventive Effect and Retention of Glass-Ionomer and Resin-Based Sealants: A Randomized Clinical Comparative Evaluation. *BioMed Research International*, 2022. <https://doi.org/10.1155/2022/7205692>
