

# Injection moulding for a predictable aesthetic outcome.

By Dr. Angel Andonovski, North Macedonia

*Dr. Angel Andonovski became a dental technician in 2012. In 2017, he graduated as a dentist at the University of St. Kiril and Metodij in Skopje, Macedonia. Thereafter, he started his 'Master in Prosthetic Dentistry' at the same university. In 2018, he received his license for general dentistry. That same year, he won the second price in the post-graduate category of the Essentia Academic Excellence Contest. Since 2012, he has been working as a dental technician and since 2018, he is working in one of the biggest dental clinics in Macedonia.*

Extensive treatment planning can be time-consuming. However, this time is often saved at the actual execution of the treatment plan. Meanwhile, the aesthetic outcome will be more predictable and the total procedure is less stressful, as part of the treatment can be done outside the mouth, in absence of the patient.

A 35-year-old woman consulted the practice because she was dissatisfied with the appearance of her frontal teeth. At the clinical assessment old restorations with marginal discolouration, a devitalised, darkened tooth #11 with a noticeable crack on the incisal surface and rotations of the lateral incisors and right canine were found. (Fig. 1).

**Figure 1:** Pre-operative intraoral view. Old restorations, cracks and discolourations are visible
