G-Premio BOND

ONE COMPONENT LIGHT-CURED ADHESIVE

For use by dental professionals in the indications for use.

INDICATIONS FOR USE

1. Direct bonding of light-cured composites and compomers to tooth structure.

2. Bonding of dual-cured bond up composite to tooth structure.

3. Intralayer repair of composite, metal and zirconia/lumina-based restorations.

4. Sealant of tooth preparation (cavity or abutment) for indirect restorations.

CONTRAINDICATION

1. Direct pulp capping.

2. Avoid use of G-Premio BOND with patients with known allergies to: latex, rubber, solvents, methacrylic polymer, or acetone.

NOT TO BE USED

1. In combination with chemically cured materials.

2. In combination with materials containing acrylates as acrylates may hinder G-Premio BOND from setting or bonding properly.

COMPOSITION

Acrylates, dimethacrylate, 4-MET, initiator, MDP, diluent dioxide, MDT, stabilizer.

DIRECTIONS FOR USE

1. DENTIN AND ENAMEL

1. CAVITY PREPARATION

Prepare tooth using standard techniques. Make sure that the preparation is clean and thoroughly removed from the surface. Use rubber dam for protection. Rinse and dry the preparation with water before gently blowing off with an air syringe.

For full curing, use calcium hydroxide.

2. TREATMENT OF TOOTH SURFACES

1. Apply G-Premio BOND to the tooth surfaces:

a) Self-etch technique

b) Etch and rinse technique

c) Separate etching.

d) Etch and prime.

e) Prime and etch.

f) Separate etching.

g) Prime and etch.

h) Separate etching.

i) Prime and etch.

j) Separate etching.

k) Prime and etch.

l) Separate etching.

m) Prime and etch.

n) Separate etching.

o) Prime and etch.
