# Support, replenish and protect with the stroke of a brush

GC introduces MI Varnish, the latest addition to your minimum intervention dentistry arsenal.
Offering superior coverage of tooth surfaces, MI Varnish **does substantially more** than your average fluoride varnish.

By delivering a powerful dose of fluoride, MI Varnish delivers an **added booster effect** of calcium and phosphate ions through its patented **Recaldent™** ingredient.

## How MI Varnish works

Thanks to the world renowned Recaldent™ MI Varnish gives patients a head start in caries protection.

**Without MI Varnish**

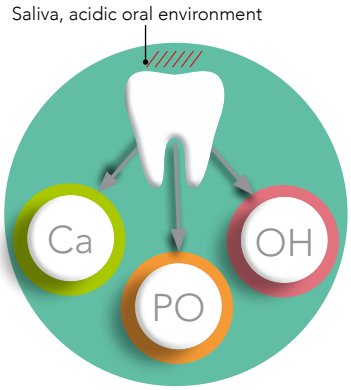
In the acidic environment of the mouth calcium, phosphate and hydroxyl ions dissolve from the tooth. This will cause the tooth to become weaker and more vulnerable.

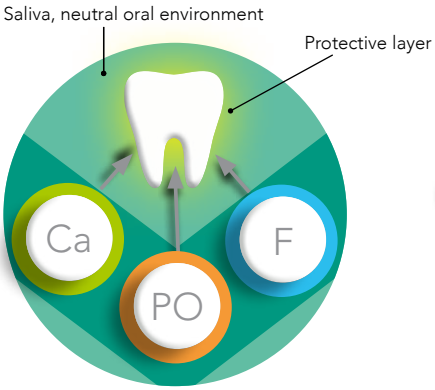
**With MI Varnish**

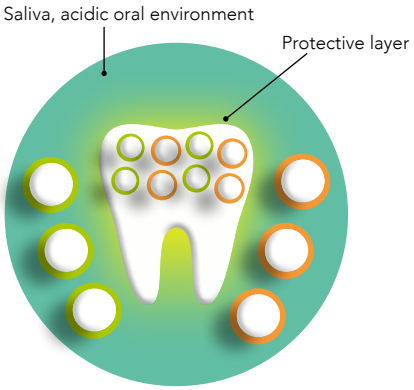
Fluoride, calcium and phosphate combine and form a strong protective coating. The neutral pH of 6,6 enhances enamel acid resistance and inhibits demineralisation.

**Coating with depot effect**

In an acidic environment, calcium and fluoride dissolve from the covering layer. As a result, the teeth are no longer under direct attack by acids.







Fluoride varnishes can prevent hypersensitivity in various clinical situations:

- MI Varnish penetrates and blocks dentinal tubules to give relief from hypersensitive teeth
- The high initial fluoride release minimises sensitivity and strengthens enamel

✔ The simple application requires no preparation or prophylaxis

✔ Comfortable and quick procedure completed within minutes

✔ Adheres quickly to the applicator brushes and flows easily in hard to reach areas

✔ Covers all tooth surfaces evenly and effectively

✔ MI Varnish sets when in contact with water or saliva, without clumping or coagulating

✔ Pleasant creamy texture, comfortable film thickness, even with multiple layers

✔ Available in 2 great tasting flavours, mint & strawberry

✔ Pleasant taste for patients

✔ Neutral shade with natural translucency

✔ No colour change when applied to the tooth

# MI Varnish, achieving mutual benefits

# MI Varnish forms part of a total MI treatment strategy

GC offers dentists the necessary tools to manage a minimum intervention continuum of care with a full suite of tailored products, ranging from diagnosis to prevention and treatment. **While MI Varnish provides high level protection and reduced sensitivity at the chairside, MI Paste can be used as follow up treatment for a patient's home care regime, extending the remineralisation effect.**

## In office

**Professional application** of MI Varnish at intervals, determined by indication and patient needs.

## At home

**Daily application** of Tooth Mousse or MI Paste Plus provides continued remineralisation and caries protection
