GC RELINE Chairside Hard Denture Reline

1. Color Stability of Hard Chair-Side Reline Materials, A.L. Van de Voorde, D.F. Murchison, C.B. Hermes, D. Li and J.M. Powers. IADR 1999, Abstract 2726
2. Evaluate the residual monomer contained in chairside denture liner polymers, G.V. Fenzi, S. Catapano, M. Scoponi and R. Scotti. IADR/CED 1999, Abstract 299
3. Assessment of shear bond strength between three denture reline materials and a denture base acrylic resin, Y. Takahashi, DDS, PhD/ J. Chai, BDS, MS, Dlaw. The International Journal of Prosthodontics, Volume 14, Number 6, 2001
4. Analisi di tre resine per ribasatura diretta – cinematica di polimerizzazione. M. Squarzony, S. Catapano, M. Scoponi, P. Baldissara. Dental Cadmos 2001 ; vol.69, 2 :69-76
5. Analysis of reline resins used as dental materials. M. Squarzony, D. Barbin, S. Catapano, V. Valentini and R. Pittau. Abstract 1858 - 82nd General Session of the IADR, Honolulu, 2004
6. Bond strength of two hard reline resins after microwave disinfection. A.D. Puckett, A.L. Machado, L. Breeding. Abstract 1618 – 83rd General Session of the IADR, Baltimore, USA.
7. Hardness and energy absorption properties of chair-side denture liners. T. Tasopoulos, R. Jagger, D. Jagger and D. Karaiskou. Abstract 200 – EADR 2009, München, Germany
8. Evaluation of adhesion of chairside hard relining materials to denture base polymers. M.M. Mutluay, I.E. Ruyter, R. Nat, Dr. Philos. The Journal of Prosthetic Dentistry, November 2005, Volume 94, N°5.
DOI: [10.1016/j.prosdent.2005.08.011](https://doi.org/10.1016/j.prosdent.2005.08.011)
9. Cytotoxicity of Hard and Soft Denture Lining Materials. A. Atay, V. Bozok-Cetintas, A. Kesercioglu, P. Guneri, E. Cal. Abstract 547 – IADR Finland 2012
10. The Effect of Food-Simulating Agents on the Bond Strength of Hard Chairside Reline Materials to Denture Base Resin. Fatemi, F. S., Vojdani, M., & Khaledi, A. A. R. (2019). Journal of Prosthodontics, 28(1), e357–e363.
<https://doi.org/10.1111/jopr.12905>
11. Bond strength of hard direct reline materials to heat-cured acrylic denture base after immersion in denture cleansers. Fatemi, F., Vojdani, M., Khaledi, A., & Mohammadi, S. (2019). Indian Journal of Dental Research, 30(6), 920–926. https://doi.org/10.4103/ijdr.IJDR_300_17
12. Machado, A. L., Breeding, L. C., & Puckett, A. D. (2006). Effect of microwave disinfection procedures on torsional bond strengths of two hard chairside denture reline materials. Journal of Prosthodontics, 15(6), 337–344.
<https://doi.org/10.1111/j.1532-849X.2006.00132.x>
13. Assessment of shear bond strength between three denture reline materials and a denture base acrylic resin. Takahashi, Y., & Chai, J. (2001). The International Journal of Prosthodontics, 14(6), 531–535.
<https://pubmed.ncbi.nlm.nih.gov/12066699/>
14. Comparison of the water sorption and solubility of four reline acrylic resins after immersion in food-simulating agents. Zirak, M., Vojdani, M., Mohammadi, S., & Khaledi, A. A. (2019). Journal of International Society of

- Preventive and Community Dentistry, 9(1), 33–39
https://doi.org/10.4103/jispcd.JISPCD_296_18
15. Synthesis, characterization, and evaluation of the antifungal properties of tissue conditioner incorporated with essential oils-loaded chitosan nanoparticles. Ashraf, H., Gul, H., Jamil, B., Saeed, A., Pasha, M., Kaleem, M., & Khan, A. S. (2022). PLoS ONE, 17(8 August), e0273079. <https://doi.org/10.1371/journal.pone.0273079>
 16. Effect of denture cleansers on Candida albicans biofilm formation over resilient liners. Huh, J. B., Lim, Y., Youn, H. I., Chang, B. M., Lee, J. Y., & Shin, S. W. (2014). Journal of Advanced Prosthodontics, 6(2), 109–114. <https://doi.org/10.4047/jap.2014.6.2.109>
 17. Evaluation of cellular toxicity of three denture base acrylic resins. Ebrahimi Saravi, M., Vojdani, M., & Bahrani, F. (2012). Journal of Dentistry (Tehran, Iran), 9(4), 180–188. <https://pubmed.ncbi.nlm.nih.gov/23323179/>
 18. Effect of Tea Tree Oil Addition to Denture Liners Against Candida albicans and Bond Strength to Acrylic Denture Bases. Günes, A., Ayaz, E. A., & Inan, C. (2024). The International Journal of Prosthodontics, 37(1), 41–48. <https://doi.org/10.11607/ijp.8368>
 19. Effect of surface treatment methods on the shear bond strength of auto-polymerized resin to thermoplastic denture base polymer. Koodaryan, R., & Hafezeqoran, A. (2016). Journal of Advanced Prosthodontics, 8(6), 504–510. <https://doi.org/10.4047/jap.2016.8.6.504>
 20. Temperature rise during intraoral polymerization of self-cured hard denture base liners. Yannikakis, S., Polychronakis, N., & Zisis, A. (2010). The European Journal of Prosthodontics and Restorative Dentistry, 18(2), 84–88. <https://pubmed.ncbi.nlm.nih.gov/20698423/>
 21. Denture Reline Materials. ADA Professional Product Review, Volume 4, Issue 1, Winter 2009
 22. Denture Base Polymers. ADA Professional Product Review, Volume 4, Issue 1, Winter 2009
