# GC Optiglaze Color is set apart by the following features & benefits:

### Time saving
- Ready to use
- Light-curing cuts polishing stage
- Easy handling & application

### Perfect aesthetics
- A wide variety of colors available
- Long-lasting gloss
- Thin coating layer (25-50 µm)

### Durable results
- High wear resistance
- Excellent bonding durability to a wide variety of polymer-based materials
- High discoloration resistance

**Packages:**

# Because everything looks better in colour

## Optiglaze® Color from GC

A light-cured characterisation coating for composite and acrylic indirect restorations

Smile for the World

Are you looking for a simple solution to add characterisation to your everyday aesthetic creations? The versatility of Optiglaze Color will impress you because it adds colour, surface gloss and high wear resistance to all your:

- Composite crowns & bridges
- Temporary resin crowns & bridges
- Hybrid Ceramic crowns
- Implant retained dentures
- Acrylic permanently fixed implant bridges
- Artificial teeth
- Acrylic dentures

## Because everything looks better in colour

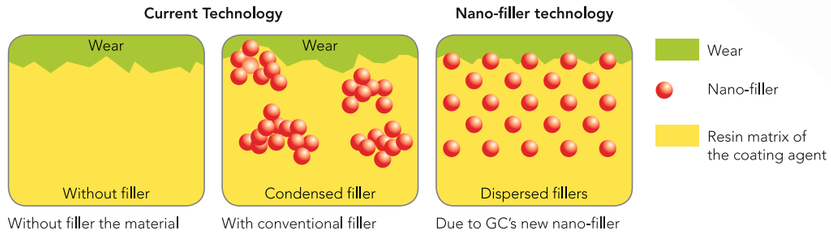
Work by MDT Christian Rothe, Germany

Work by MDT Simone Maffei, Italy

# Optiglaze Color will impress you

- Ready to use, easy to handle and cuts on the polishing stage, saving you valuable time
- You can choose from a wide variety of colors, both for internal and external characterisation, leading to perfect aesthetics
- The renowned nano-filler technology gives your restoration a high wear resistance, for long-lasting gloss with a high discolouration resistance

Optiglaze Color contains GC's renowned nano-filler technology, giving it a high wear resistance for long-lasting gloss.



Without filler the material can wear easily.

With conventional filler technology the clustering of the particles readily occurs and the material can still be susceptible to wear.

Due to GC's new nano-filler technology, the particles are evenly dispersed, offering a high wear and discolouration durability and a long lasting gloss!
