

Sandrine, 34 years old,
treated with **EXPERIENCE L**

Why have Orthodontic Treatment?

To correct improperly positioned teeth, because you deserve to have the smile you've always wanted.

How Long does Treatment Last?

Treatment time typically lasts between 12 – 36 months. Once started, you must continue all the way until your treatment ends to obtain the desired results.

Achieving Results

When using products from GC Orthodontics, your orthodontist is confident that he is offering treatments of superior quality that help achieve the best treatment results possible, while still providing the highest level of comfort for each patient.

EXPERIENCE L and EXPERIENCE LSB Self-Ligating Lingual Appliances

Aesthetic: The bracket is placed on the internal side of the tooth (lingual side) making the appliance completely invisible.

Comfort: New technology allows your orthodontist to use a more comfortable lighter force when moving your teeth, while achieving the same results.

Hygiene: With no elastic ties that potentially attract bacteria, the bracket makes dental hygiene during treatment easy. When wearing an orthodontic appliance it is important to practice good oral hygiene and to brush teeth after every meal.

How Does a Self-Ligating Appliance Work?

Three key elements are needed, which when used together create a high performance self-ligating appliance:

- **Bracket** - Bonded to the teeth, it acts as a guide to achieve ideal teeth alignment at the end of treatment.
- **Archwire** - Is the appliance's motor, the archwire is inserted into the bracket, gently moving the teeth until they reach their predicted position. To facilitate movement, the archwire is replaced several times over the course of treatment.
- **Clip** – Exclusively used in self-ligating brackets, the clip holds the archwire into place in the bracket's slot.

SL Product

The points made in this brochure are for guidance only. Your Orthodontist is the only qualified person for making a diagnosis and establishing a proper treatment plan. There are many variables involved in your treatment plan, therefore treatment times vary from one patient to another. **Ask your Orthodontist which treatment is the best for you.**

Lingual Orthodontics, an Invisible Treatment Solution

Lingual orthodontics consists of correcting the position of the teeth by bonding the appliance to the back of the teeth, so it is completely hidden. No one will know you are wearing an appliance. Results from lingual treatment are the same as with traditional treatment, but these results are achieved with a highly aesthetic, invisible appliance.

A lingual solution is available to anyone with healthy teeth and gums. With lingual orthodontics, regardless of whether you are an adult or teen an adapted treatment solution can be created, no matter what the issue.
