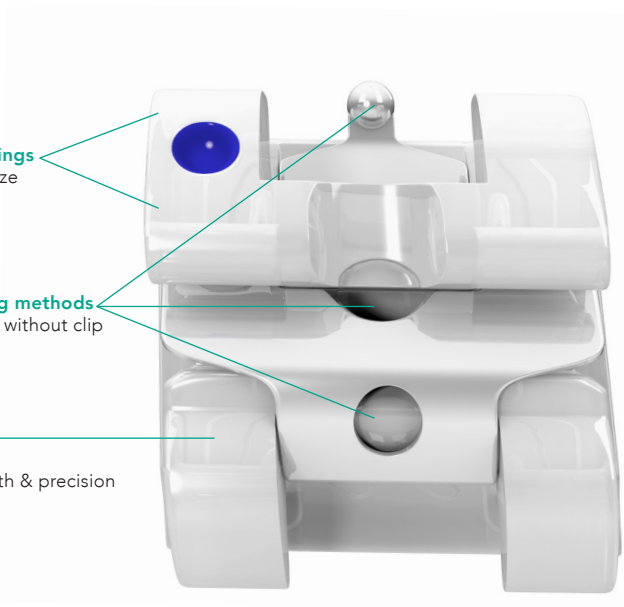
EXPERIENCE™
ceramic and ceramic mini

Self-Ligating ceramic treatments.

SL Product
Hi Aesthetic

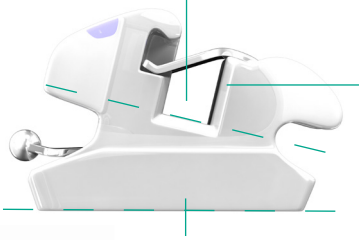


Smooth swept tie-wings
Engineered to minimize occlusal interference

Multiple clip opening methods
For easy clip opening without clip deformation

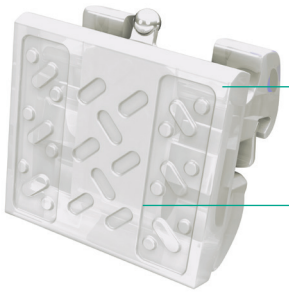
Ceramic injection molding bracket
For uniformity, strength & precision

CNC milled slot



Triple chamfered slot
For easy wire engagement and to eliminate arch wire binding & notching

Torque in Base



Compound contoured
Pad is designed to provide an anatomically correct fit for each tooth

Mechanical lock
For ´reliable bond strength & the option to reposition, if necessary

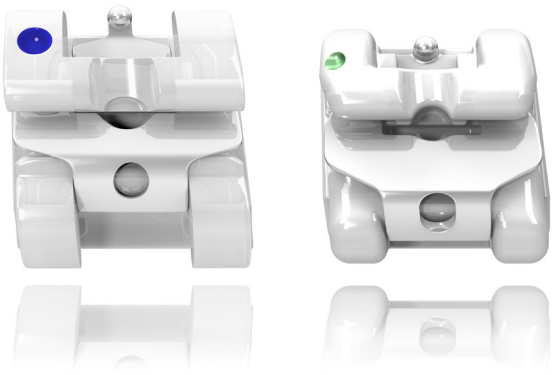
The EXPERIENCE™ collection of self-ligating orthodontic brackets provides doctors and patients with a range of options for orthodontic treatment. EXPERIENCE™ brackets are designed to reduce friction during initial leveling and aligning and support control during finishing.

After the metal or ceramic injection process (MIM or CIM), a cooling phase occurs where the mold retracts. TOMY then incorporates an additional step to ensure precision in the archwire slot, using Computer Numerical Controlled (CNC) milling. This process ensures that every slot in the EXPERIENCE™ collection is precisely .018" or .022". The milling cutter is changed every 1.000 brackets to maintain consistent precision. The brackets are designed to express the torque and angulation programmed into each one.



Debonding EXPERIENCE C

Self Ligation Features

- Great patient comfort
- Efficient chair time
- Streamlined treatment process
- Good patient hygiene
- Pleasing aesthetics

passive interactive active

We recommend using GC Ortho Connect™ for bonding your brackets. The one step system incorporates the primer into the composite.

Bracket advantages

EXPERIENCE ceramic - This ceramic self-ligating twin bracket offers outstanding aesthetics and performance. The bracket features a rhodium coated clip that blends into the ceramic body of the bracket creating a beautiful appearance. The base has a 100% mechanical lock ensuring both reliable bond strength and easy debonding.

TOMY

The EXEPRIENCE collection is manufactured by TOMY Inc., a leading manufacturer of self-ligating brackets since 2000. EXPERIENCE is available in standard and mini sizes, and made of metal, rhodium, and ceramic material.
Available in TGO, CCO, MBT Type, Roth Type and Extra Torque

Bracket & Archwire Combination

Pair EXPERIENCE ceramic with our Initalloy, BIO-ACTIVE, and BIO-EDGE thermal NiTi archwires. Rhodium-coated archwires are also available for a discreet orthodontic bracket system.
